1. Credit Analyst Intern

Job Summary:

The Credit Analyst Intern supports the credit team in evaluating borrower creditworthiness by assisting in financial analysis, data collection, and risk assessment under supervision.

Key Responsibilities:

- Assist in analyzing financial statements (P&L, Balance Sheet, Cash Flow).
- Prepare basic credit appraisal notes.
- Conduct ratio analysis and trend analysis.
- Support loan file documentation and verification.
- Perform industry and competitor research.
- Assist in credit risk assessment reports.
- Maintain borrower data in internal systems.

Required Skills:

- Basic knowledge of financial statements.
- Understanding of accounting principles.
- MS Excel proficiency.
- Analytical mindset and attention to detail.

Qualification:

- B.Com / BBA / BA (Economics) / MBA (Finance – pursuing)
- CFA Level 1 (optional advantage)

---

2. Junior Credit Analyst

Job Summary:

Responsible for preliminary credit analysis of loan applications and supporting senior analysts in credit decision-making.

Key Responsibilities:

- Analyze borrower financial statements.
- Evaluate repayment capacity and cash flow.
- Calculate key financial ratios (DSCR, Current Ratio, Debt-Equity).
- Conduct credit bureau analysis.
- Prepare credit appraisal reports.
- Coordinate with sales and relationship teams.

Required Skills:

- Financial modeling basics.
- Risk assessment knowledge.
- Good communication skills.
- Excel & reporting tools proficiency.

Qualification:

- B.Com / MBA Finance / CA Inter
- 0–2 years experience in banking/NBFC

---

3. Credit Risk Analyst – Entry Level

Job Summary:

Assists in identifying and measuring credit risk exposure across loan portfolios.

Key Responsibilities:

- Monitor portfolio risk metrics.
- Support PD, LGD, EAD analysis (basic level).
- Prepare risk dashboards and MIS reports.
- Analyze default trends and delinquency ratios.
- Assist in stress testing exercises.

Required Skills:

- Strong analytical & quantitative skills.
- Excel, Power BI (preferred).
- Understanding of risk frameworks.

Qualification:

- MBA Finance / FRM Level 1 (preferred)
- 0–2 years in risk/credit

---

4. Loan Processing Analyst

Job Summary:

Handles end-to-end loan documentation, data validation, and processing before credit approval.

Key Responsibilities:

- Verify applicant documentation.
- Check income proofs, bank statements, KYC documents.
- Input loan data into system.
- Coordinate with underwriting team.
- Ensure compliance with internal credit policies.

Required Skills:

- Strong documentation skills.
- Attention to detail.
- Process-oriented mindset.

Qualification:

- Graduate in Commerce/Management
- Experience in banking operations preferred

---

5. Credit Underwriting Trainee

Job Summary:

Supports underwriting team in evaluating credit applications and recommending approval or rejection.

Key Responsibilities:

- Review credit proposals.
- Assess income stability and repayment history.
- Analyze credit bureau reports.
- Ensure compliance with underwriting policies.
- Prepare risk notes for approval authority.

Required Skills:

- Credit evaluation knowledge.
- Decision-making ability.
- Strong risk awareness.

Qualification:

- MBA Finance / B.Com
- 0–1 year experience or fresher

---

6. Commercial Credit Associate

Job Summary:

Assists in evaluating creditworthiness of SMEs and commercial clients.

Key Responsibilities:

- Analyze SME financial statements.
- Assess working capital requirements.
- Evaluate collateral security.
- Prepare commercial credit reports.
- Support relationship managers.

Required Skills:

- Knowledge of SME lending.
- Understanding of working capital cycles.
- Financial statement analysis.

Qualification:

- MBA Finance / CA Inter
- 0–2 years in commercial banking

---

7. Retail Credit Officer

Job Summary:

Evaluates retail loan applications such as personal loans, auto loans, and home loans.

Key Responsibilities:

- Review loan applications.
- Conduct credit score analysis.
- Verify employment and income details.
- Assess EMI affordability.
- Ensure compliance with retail lending policy.

Required Skills:

- Understanding of retail banking products.
- Good communication skills.
- Decision-making ability.

Qualification:

- Graduate / MBA Finance
- Experience in retail banking preferred

---

8. Credit Operations Executive

Job Summary:

Handles backend credit processing, documentation tracking, and operational support.

Key Responsibilities:

- Maintain loan records.
- Monitor disbursement processes.
- Track pending documentation.
- Prepare daily MIS reports.
- Coordinate with legal & compliance teams.

Required Skills:

- Process management.
- Excel & MIS reporting.
- Organizational skills.

Qualification:

- Any Commerce/Management Graduate
- 0–2 years operations experience

---

9. Credit Documentation Officer

Job Summary:

Ensures accurate and compliant preparation and verification of credit-related documents.

Key Responsibilities:

- Verify loan agreements.
- Check mortgage and collateral documents.
- Ensure proper stamping and legal compliance.
- Maintain document repository.
- Coordinate with legal team.

Required Skills:

- Knowledge of loan documentation.
- Legal awareness (basic).
- Attention to detail.

Qualification:

- B.Com / LLB (preferred)
- Banking documentation experience preferred

---

10. KYC & Credit Verification Analyst

Job Summary:

Responsible for verifying customer identity and conducting due diligence before loan approval.

Key Responsibilities:

- Perform KYC verification (PAN, Aadhaar, etc.).
- Conduct AML checks.
- Validate customer address and employment.
- Verify credit bureau data.
- Identify fraud risks.

Required Skills:

- Knowledge of KYC/AML regulations.
- Attention to compliance.
- Analytical mindset.

Qualification:

- Graduate in Commerce/Finance
- Knowledge of RBI guidelines preferred

11. Credit Analyst

Job Summary:

Responsible for evaluating the creditworthiness of borrowers by analyzing financial statements, repayment capacity, and risk exposure to support informed lending decisions.

Key Responsibilities:

- Analyze financial statements and cash flow projections.
- Conduct ratio analysis (DSCR, Debt-Equity, Interest Coverage).
- Review credit bureau reports and repayment history.
- Prepare credit appraisal memos.
- Assess collateral and security coverage.
- Monitor existing loan accounts for early warning signals.
- Ensure compliance with internal credit policies.

Required Skills:

- Financial statement analysis
- Risk assessment
- Strong Excel & reporting skills
- Analytical thinking

Qualification:

- MBA Finance / CA Inter / CFA Level 1
- 2–5 years in banking/NBFC/financial institution

---

12. Senior Credit Analyst

Job Summary:

Leads credit evaluation for complex cases and provides recommendations to credit committees or senior management.

Key Responsibilities:

- Review and approve credit proposals.
- Conduct in-depth industry and market analysis.
- Mentor junior analysts.
- Evaluate high-value or high-risk exposures.
- Participate in credit committee meetings.
- Recommend risk mitigation strategies.
- Monitor portfolio quality.

Required Skills:

- Advanced financial modeling
- Risk judgment & decision-making

- Leadership & mentoring
- Strong presentation skills

Qualification:

- MBA Finance / CA / CFA
- 5–8 years experience in credit analysis

---

13. Corporate Credit Analyst

Job Summary:

Evaluates credit risk of large corporate clients, focusing on financial strength, industry risk, and long-term viability.

Key Responsibilities:

- Analyze audited financial statements of corporates.
- Assess capital structure and funding patterns.
- Conduct sector analysis and competitor benchmarking.
- Evaluate working capital and term loan requirements.
- Review corporate governance practices.
- Prepare detailed credit risk reports.

Required Skills:

- Corporate finance expertise
- Industry analysis capability
- Advanced financial modeling
- Risk rating knowledge

Qualification:

- MBA Finance / CA / CFA
- 3–7 years in corporate banking

---

14. Commercial Credit Analyst

Job Summary:

Assesses creditworthiness of mid-sized commercial businesses and evaluates working capital and term loan proposals.

Key Responsibilities:

- Analyze SME/commercial borrower financials.
- Evaluate business cash cycles.
- Assess collateral adequacy.
- Perform site visits and management discussions.
- Prepare commercial credit proposals.
- Monitor loan performance.

Required Skills:

- Knowledge of business models
- Working capital assessment
- Strong analytical skills

Qualification:

- MBA Finance / CA Inter
- 3–6 years in commercial lending

---

15. Retail Credit Analyst

Job Summary:

Evaluates credit applications for retail customers including personal, home, auto, and consumer loans.

Key Responsibilities:

- Assess income stability and repayment capacity.
- Analyze credit score and bureau reports.
- Verify employment and income documents.
- Apply retail credit scoring models.
- Recommend approval/rejection.
- Monitor retail portfolio delinquency.

Required Skills:

- Understanding of retail lending products
- Risk-based pricing knowledge
- Strong documentation review skills

Qualification:

- Graduate / MBA Finance
- 2–5 years in retail banking

---

16. SME Credit Analyst

Job Summary:

Specializes in evaluating credit risk for small and medium enterprises (SMEs).

Key Responsibilities:

- Analyze SME financial statements.
- Assess working capital gaps.
- Evaluate promoter background and business viability.
- Conduct industry analysis.
- Structure loan facilities.
- Monitor repayment performance.

Required Skills:

- SME sector knowledge
- Cash flow forecasting
- Risk structuring ability

Qualification:

- MBA Finance / CA Inter
- 3–6 years SME lending experience

---

17. Project Finance Credit Analyst

Job Summary:

Evaluates large infrastructure and project-based financing proposals.

Key Responsibilities:

- Analyze project feasibility studies.
- Review projected cash flows and IRR.
- Evaluate long-term funding structures.
- Conduct sensitivity and scenario analysis.
- Assess regulatory and execution risks.
- Prepare detailed project credit reports.

Required Skills:

- Financial modeling (project finance models)
- Knowledge of IRR, NPV, DSCR
- Infrastructure sector understanding

Qualification:

- MBA Finance / CA / CFA
- 4–8 years in project finance

---

18. Structured Finance Analyst

Job Summary:

Analyzes structured finance products including securitization, ABS, MBS, and complex debt instruments.

Key Responsibilities:

- Evaluate structured loan transactions.
- Analyze asset pools and cash flow waterfalls.
- Conduct risk modeling.
- Assess legal structures and SPVs.
- Prepare transaction risk reports.
- Coordinate with legal and compliance teams.

Required Skills:

- Advanced financial modeling
- Understanding of securitization
- Quantitative analysis skills

Qualification:

- MBA Finance / CFA
- 3–7 years in structured finance

---

19. Trade Finance Credit Analyst

Job Summary:

Assesses credit risk related to trade finance products such as LC, BG, and export-import financing.

Key Responsibilities:

- Analyze client trade cycles.
- Assess country and counterparty risk.
- Evaluate documentary credit transactions.
- Review export/import contracts.
- Monitor exposure limits.
- Ensure compliance with trade regulations.

Required Skills:

- Knowledge of trade finance instruments
- International risk understanding
- Regulatory knowledge (UCP 600, etc.)

Qualification:

- MBA Finance / Commerce Graduate
- 3–6 years in trade finance

---

20. Loan Review Analyst

Job Summary:

Conducts independent reviews of approved loans to ensure policy compliance and identify credit risk issues.

Key Responsibilities:

- Review loan files post-disbursement.
- Identify deviations from credit policy.
- Assess asset quality.
- Evaluate risk ratings accuracy.
- Prepare audit and review reports.
- Recommend corrective actions.

Required Skills:

- Credit policy knowledge
- Strong analytical skills
- Audit mindset

Qualification:

- MBA Finance / CA / CPA
- 3–7 years in credit review/audit

21. Credit Risk Analyst

Job Summary:

Responsible for identifying, measuring, and monitoring credit risk exposure across lending portfolios to minimize potential losses.

Key Responsibilities:

- Analyze borrower and portfolio risk metrics.
- Monitor delinquency and default trends.
- Calculate risk parameters (PD, LGD, EAD).
- Prepare risk dashboards and MIS reports.
- Support credit risk reporting to management.
- Identify early warning signals (EWS).
- Ensure compliance with internal risk frameworks.

Required Skills:

- Financial analysis & risk assessment
- Excel / SQL / Power BI
- Understanding of credit risk models

Qualification:

- MBA Finance / FRM Level 1 preferred
- 2–5 years in risk/credit analysis

---

22. Senior Credit Risk Analyst

Job Summary:

Leads credit risk evaluation and portfolio monitoring, supporting strategic decision-making and risk mitigation.

Key Responsibilities:

- Review complex credit exposures.
- Validate internal risk rating models.
- Oversee portfolio risk trends and concentration risk.
- Present risk insights to senior management.
- Mentor junior analysts.
- Recommend risk mitigation strategies.

Required Skills:

- Advanced quantitative skills
- Risk modeling expertise
- Strong presentation and reporting ability

Qualification:

- MBA Finance / FRM / CFA
- 5–8 years in credit risk management

---

23. Risk & Credit Analyst

Job Summary:

Combines credit underwriting and portfolio risk monitoring responsibilities to ensure balanced risk-return decisions.

Key Responsibilities:

- Evaluate individual credit proposals.
- Monitor portfolio-level risk exposure.
- Analyze sectoral and geographic concentration.
- Support risk-based pricing decisions.
- Prepare credit risk assessment reports.
- Ensure regulatory compliance.

Required Skills:

- Financial modeling
- Credit appraisal expertise
- Risk analytics

Qualification:

- MBA Finance / CA Inter
- 3–6 years experience

---

24. Portfolio Risk Analyst

Job Summary:

Monitors and manages risk across entire loan portfolios to maintain asset quality and minimize losses.

Key Responsibilities:

- Analyze portfolio concentration and diversification.
- Monitor NPA and delinquency ratios.
- Conduct vintage analysis.
- Prepare risk trend reports.
- Recommend provisioning strategies.
- Support capital allocation planning.

Required Skills:

- Portfolio analytics
- Data interpretation
- Knowledge of provisioning norms

Qualification:

- MBA Finance / FRM preferred
- 3–6 years in portfolio risk

---

25. Credit Risk Modeling Analyst

Job Summary:

Develops and validates statistical models used to predict credit risk and default probability.

Key Responsibilities:

- Build PD, LGD, and EAD models.
- Perform regression and statistical analysis.
- Validate risk models.
- Conduct back-testing and stress scenarios.
- Work with large datasets.
- Support automation of risk scoring systems.

Required Skills:

- Strong quantitative & statistical knowledge
- Python / R / SAS / SQL
- Machine learning basics (preferred)

Qualification:

- MBA Finance / FRM / Quantitative background
- 3–7 years in credit risk modeling

---

26. Basel Risk Analyst

Job Summary:

Ensures compliance with Basel II/III norms and regulatory capital requirements.

Key Responsibilities:

- Calculate Risk-Weighted Assets (RWA).
- Prepare capital adequacy reports.
- Support ICAAP documentation.
- Implement Basel framework guidelines.
- Monitor regulatory reporting.
- Coordinate with regulatory bodies.

Required Skills:

- Basel norms knowledge
- Regulatory compliance expertise
- Strong analytical skills

Qualification:

- MBA Finance / CA / FRM
- 3–7 years in regulatory risk

---

27. IFRS 9 Credit Analyst

Job Summary:

Responsible for Expected Credit Loss (ECL) calculation and financial reporting under IFRS 9 standards.

Key Responsibilities:

- Calculate 12-month and lifetime ECL.
- Classify financial assets (Stage 1, 2, 3).
- Implement forward-looking macroeconomic adjustments.
- Prepare impairment reports.
- Coordinate with finance & audit teams.
- Ensure compliance with accounting standards.

Required Skills:

- IFRS 9 & ECL modeling knowledge
- Financial reporting understanding
- Risk modeling skills

Qualification:

- CA / CPA / MBA Finance
- 3–6 years in accounting & credit risk

---

28. Stress Testing Analyst

Job Summary:

Evaluates portfolio resilience under adverse economic scenarios.

Key Responsibilities:

- Develop stress testing frameworks.
- Run macroeconomic stress simulations.
- Assess impact on capital adequacy.
- Prepare stress scenario reports.
- Support regulatory stress testing requirements.
- Analyze sensitivity of credit portfolios.

Required Skills:

- Scenario modeling
- Strong data analysis
- Risk forecasting ability

Qualification:

- MBA Finance / FRM
- 3–6 years in risk analytics

---

29. Credit Policy Analyst

Job Summary:

Designs and updates credit policies to ensure effective risk management and regulatory compliance.

Key Responsibilities:

- Draft and revise credit policies.
- Align policies with regulatory guidelines.
- Monitor policy adherence.
- Analyze policy exceptions and deviations.
- Support internal audits.
- Recommend policy improvements.

Required Skills:

- Strong regulatory knowledge
- Policy drafting expertise
- Risk awareness

Qualification:

- MBA Finance / CA
- 4–7 years in credit/risk management

---

30. Counterparty Risk Analyst

Job Summary:

Assesses risk exposure arising from financial counterparties in trading and derivative transactions.

Key Responsibilities:

- Evaluate counterparty credit exposure.
- Monitor credit limits.
- Analyze derivative and trading positions.
- Conduct credit limit reviews.
- Assess country and sovereign risk.
- Prepare exposure reports.

Required Skills:

- Knowledge of derivatives and trading products
- Risk analytics
- Strong quantitative skills

Qualification:

- MBA Finance / CFA / FRM
- 3–7 years in banking or investment risk

---

31. Exposure Management Analyst

Job Summary:

Manages credit exposure levels to ensure portfolio diversification and risk control.

Key Responsibilities:

- Monitor exposure limits (sector, borrower, geography).
- Analyze concentration risk.
- Prepare exposure dashboards.
- Support capital allocation strategies.
- Recommend limit revisions.
- Ensure compliance with regulatory caps.

Required Skills:

- Risk reporting
- Data analytics
- Strong understanding of exposure metrics

Qualification:

- MBA Finance / FRM
- 3–6 years in risk or credit portfolio management

32. Relationship Credit Manager

Job Summary:

Responsible for managing credit evaluation and approval in coordination with Relationship Managers while ensuring balanced risk and business growth.

Key Responsibilities:

- Evaluate credit proposals sourced by Relationship Managers.
- Conduct financial and risk analysis of borrowers.
- Structure loan facilities and repayment terms.
- Participate in client meetings and due diligence visits.
- Ensure compliance with internal credit policy.
- Present cases to credit committee.
- Monitor account performance post-disbursement.

Required Skills:

- Strong credit appraisal skills
- Client interaction capability
- Risk structuring expertise
- Business acumen

Qualification:

- MBA Finance / CA / CFA
- 5–8 years in corporate/commercial banking

---

33. Credit Appraisal Officer

Job Summary:

Conducts detailed credit analysis and prepares appraisal reports for loan approval.

Key Responsibilities:

- Analyze financial statements and cash flow.
- Conduct ratio analysis and risk grading.
- Evaluate collateral and security coverage.
- Prepare comprehensive credit appraisal notes.
- Ensure adherence to regulatory and policy guidelines.
- Coordinate with legal and operations teams.

Required Skills:

- Financial statement analysis
- Risk assessment capability
- Strong documentation skills

Qualification:

- MBA Finance / CA Inter
- 3–6 years in credit appraisal

---

34. Credit Sanctioning Officer

Job Summary:

Responsible for reviewing credit proposals and granting sanction within delegated authority limits.

Key Responsibilities:

- Review appraisal reports and risk ratings.
- Approve/reject proposals within authority limits.
- Recommend high-value proposals to higher authority.
- Ensure compliance with risk framework.
- Monitor sanction conditions.
- Maintain approval documentation records.

Required Skills:

- Strong risk judgment
- Decision-making ability
- Regulatory knowledge

Qualification:

- MBA Finance / CA
- 5–10 years in banking credit roles

---

35. Loan Approval Officer

Job Summary:

Handles final approval of retail or commercial loan applications after reviewing underwriting assessments.

Key Responsibilities:

- Verify completeness of loan documentation.
- Review credit scoring and risk analysis.
- Ensure policy compliance.
- Approve or decline applications.
- Communicate approval terms to operations.
- Monitor disbursement process.

Required Skills:

- Knowledge of lending products
- Risk evaluation skills
- Attention to compliance

Qualification:

- Graduate / MBA Finance
- 3–7 years in loan underwriting

---

36. Credit Monitoring Officer

Job Summary:

Monitors approved loans to ensure repayment compliance and early detection of potential defaults.

Key Responsibilities:

- Track repayment schedules.
- Monitor account performance and financial covenants.
- Identify early warning signals (EWS).
- Conduct periodic credit reviews.
- Prepare asset quality reports.
- Recommend corrective actions.

Required Skills:

- Portfolio monitoring expertise
- Analytical thinking
- Risk reporting skills

Qualification:

- MBA Finance / CA Inter
- 3–6 years in credit monitoring

---

37. Recovery & Credit Control Officer

Job Summary:

Responsible for managing overdue accounts and minimizing credit losses.

Key Responsibilities:

- Track delinquent accounts.
- Initiate recovery actions.
- Coordinate with legal teams for recovery cases.
- Negotiate settlement plans.
- Monitor provisioning requirements.

- Prepare recovery performance reports.

Required Skills:

- Negotiation skills
- Knowledge of recovery laws (SARFAESI in India)
- Strong follow-up ability

Qualification:

- Graduate / MBA Finance
- 3–7 years in recovery/collections

---

38. Branch Credit Manager

Job Summary:

Oversees credit operations and risk management at branch level while supporting business growth.

Key Responsibilities:

- Supervise branch-level credit processing.
- Approve loans within delegated authority.
- Ensure compliance with credit policy.
- Manage branch credit portfolio quality.
- Train credit officers.
- Coordinate with regional office.

Required Skills:

- Leadership ability
- Credit decision-making
- Portfolio management

Qualification:

- MBA Finance / CA
- 6–10 years in banking credit roles

---

39. Regional Credit Manager

Job Summary:

Manages credit operations and portfolio risk across multiple branches within a region.

Key Responsibilities:

- Review high-value credit proposals.
- Monitor regional asset quality.
- Implement risk control measures.
- Guide branch credit managers.
- Conduct portfolio review meetings.
- Report regional credit performance to HO.

Required Skills:

- Strategic risk management
- Strong leadership
- Regional portfolio oversight

Qualification:

- MBA Finance / CA / CFA
- 8–12 years in banking credit

---

40. Zonal Credit Head

Job Summary:

Leads credit strategy and risk management across a large geographical zone, ensuring asset quality and compliance.

Key Responsibilities:

- Define zonal credit risk strategy.
- Approve large and complex credit exposures.
- Monitor zonal portfolio concentration and NPAs.
- Lead regional credit teams.
- Ensure regulatory compliance.
- Present performance updates to senior management.

Required Skills:

- Advanced risk strategy expertise
- Strong leadership & decision-making
- Regulatory knowledge
- Portfolio risk management

Qualification:

- MBA Finance / CA / CFA
- 12–18+ years in banking credit leadership

41. Corporate Finance & Credit Analyst

Job Summary:

Responsible for evaluating corporate funding requirements, assessing credit risk, and supporting capital structure decisions within large organizations or advisory firms.

Key Responsibilities:

- Analyze corporate financial statements and cash flows.
- Evaluate capital structure and debt capacity.
- Conduct credit risk assessment for funding proposals.
- Support debt restructuring and refinancing decisions.
- Prepare financial models and valuation analysis.
- Coordinate with banks, lenders, and investors.
- Monitor covenant compliance and credit exposure.

Required Skills:

- Corporate finance expertise
- Advanced financial modeling
- Credit risk analysis
- Strong Excel & PowerPoint skills

Qualification:

- MBA Finance / CA / CFA
- 3–7 years in corporate finance or advisory

---

42. Investment & Credit Analyst

Job Summary:

Analyzes credit risk and investment potential of fixed income securities, corporate bonds, and structured debt instruments.

Key Responsibilities:

- Evaluate corporate debt instruments.
- Conduct credit risk and return analysis.
- Perform valuation of bonds and debt securities.
- Monitor credit ratings and market movements.
- Prepare investment recommendations.
- Conduct industry and macroeconomic research.

Required Skills:

- Fixed income analysis
- Financial modeling
- Market research capability
- Strong analytical mindset

Qualification:

- MBA Finance / CFA (preferred)
- 3–6 years in investment research or asset management

---

43. Fixed Income Credit Analyst

Job Summary:

Responsible for analyzing credit quality of issuers in the fixed income market and supporting bond investment decisions.

Key Responsibilities:

- Analyze issuer financial statements.
- Evaluate credit spreads and yield curves.
- Assess default risk and recovery prospects.
- Monitor macroeconomic impact on bond markets.
- Provide buy/sell/hold recommendations.
- Prepare credit review reports.

Required Skills:

- Strong fixed income knowledge
- Understanding of duration, yield, convexity
- Credit risk analysis
- Quantitative aptitude

Qualification:

- CFA preferred
- MBA Finance / CA

- 3–7 years in fixed income research

---

44. Debt Capital Markets (DCM) Analyst

Job Summary:

Supports origination and execution of debt issuance transactions including bonds and syndicated loans.

Key Responsibilities:

- Assist in structuring bond issuance.
- Prepare pitch books and client presentations.
- Conduct credit analysis of issuers.
- Coordinate with legal and compliance teams.
- Monitor debt market conditions.
- Support pricing and investor communication.

Required Skills:

- Capital markets knowledge
- Financial modeling
- Presentation and communication skills
- Market awareness

Qualification:

- MBA Finance / CFA
- 2–5 years in investment banking or DCM

---

45. Bond Credit Analyst

Job Summary:

Evaluates the creditworthiness of bond issuers and supports investment or rating decisions.

Key Responsibilities:

- Analyze bond issuer financial performance.
- Assess credit ratings and risk outlook.
- Monitor bond covenants and default risk.
- Conduct sector analysis.
- Prepare bond evaluation reports.

- Track secondary market bond performance.

Required Skills:

- Bond market expertise
- Credit research skills
- Analytical thinking

Qualification:

- CFA preferred
- MBA Finance / CA
- 3–6 years in bond research or asset management

---

46. Credit Research Analyst

Job Summary:

Conducts in-depth credit research on companies and industries to support investment or lending decisions.

Key Responsibilities:

- Analyze financial statements and debt structure.
- Prepare detailed credit research reports.
- Assess industry and macroeconomic trends.
- Monitor rating changes and credit events.
- Conduct management discussions.
- Provide credit outlook recommendations.

Required Skills:

- Strong financial analysis
- Research capability
- Report writing expertise
- Attention to detail

Qualification:

- MBA Finance / CFA
- 2–6 years in credit research or rating agency

---

47. Private Equity Credit Analyst

Job Summary:

Evaluates credit risk in leveraged buyouts (LBOs) and private equity-backed transactions.

Key Responsibilities:

- Analyze target company financials.
- Conduct LBO modeling and debt capacity analysis.
- Assess repayment ability under leveraged structures.
- Evaluate exit scenarios.
- Support investment committee decisions.
- Monitor portfolio company leverage and performance.

Required Skills:

- LBO modeling expertise
- Advanced financial modeling
- Risk-return evaluation
- Strong analytical skills

Qualification:

- MBA Finance / CFA
- 3–7 years in PE, investment banking, or leveraged finance

---

48. Infrastructure Finance Analyst

Job Summary:

Evaluates financing structures and credit risks for large infrastructure projects such as power, roads, telecom, and renewable energy.

Key Responsibilities:

- Analyze project feasibility and revenue models.
- Conduct NPV, IRR, and DSCR analysis.
- Evaluate long-term funding structures.
- Assess regulatory and execution risks.
- Monitor project milestones and financial health.
- Prepare infrastructure credit assessment reports.

Required Skills:

- Project finance modeling
- Infrastructure sector knowledge
- Risk analysis expertise

- Financial forecasting skills

Qualification:

- MBA Finance / CA / CFA
- 3–8 years in project/infrastructure finance

49. Digital Credit Analyst

Job Summary:

Responsible for evaluating borrower creditworthiness using digital data sources, automated systems, and alternative scoring models in online lending platforms.

Key Responsibilities:

- Analyze loan applications through digital credit systems.
- Review credit bureau data and digital financial footprints.
- Evaluate repayment capacity using automated scorecards.
- Monitor digital lending portfolio performance.
- Identify fraud patterns and risk flags.
- Collaborate with tech teams to improve credit algorithms.
- Ensure compliance with RBI/digital lending guidelines.

Required Skills:

- Understanding of digital lending models
- Data analysis skills
- Knowledge of credit scoring systems
- Excel / SQL familiarity

Qualification:

- MBA Finance / B.Tech / Data Analytics background
- 2–5 years in fintech or NBFC

---

50. Algorithmic Credit Risk Analyst

Job Summary:

Develops and enhances automated credit scoring algorithms using statistical and machine learning techniques.

Key Responsibilities:

- Build predictive models for default risk.
- Develop credit scoring algorithms.
- Perform data cleaning and feature engineering.
- Validate model accuracy and stability.
- Conduct A/B testing for risk models.
- Collaborate with data science and product teams.
- Monitor model performance and recalibrate as needed.

Required Skills:

- Python / R / SQL
- Machine Learning & Statistics
- Risk modeling knowledge
- Strong quantitative ability

Qualification:

- MBA Finance / FRM / Data Science / Engineering
- 3–7 years in risk analytics or modeling

---

51. Credit Data Analyst

Job Summary:

Analyzes large datasets to identify credit risk trends and improve lending decisions.

Key Responsibilities:

- Extract and analyze borrower data.
- Create dashboards and risk reports.
- Identify portfolio performance patterns.
- Support decision-making with data insights.
- Monitor delinquency and recovery trends.
- Perform segmentation analysis.
- Support risk model improvements.

Required Skills:

- SQL / Excel / Power BI / Tableau
- Strong data interpretation skills
- Understanding of credit risk metrics

Qualification:

- Graduate / MBA Finance / Data Analytics
- 2–5 years in analytics or fintech

---

52. Lending Risk Analyst

Job Summary:

Manages overall lending risk by monitoring portfolio health, underwriting policies, and loss trends.

Key Responsibilities:

- Evaluate risk across digital lending portfolios.
- Analyze approval and rejection trends.
- Monitor NPA and default ratios.
- Implement risk-based pricing strategies.
- Recommend changes to underwriting policies.
- Conduct stress testing for digital loans.
- Ensure regulatory compliance.

Required Skills:

- Risk management knowledge
- Portfolio analysis
- Strong analytical and reporting skills

Qualification:

- MBA Finance / FRM
- 3–6 years in lending or risk management

---

53. Consumer Credit Analyst (BNPL)

Job Summary:

Evaluates consumer credit applications for Buy Now Pay Later (BNPL) and short-term digital lending products.

Key Responsibilities:

- Analyze customer transaction behavior.

- Review alternative credit scoring results.
- Assess repayment risk for short-term loans.
- Monitor consumer default patterns.
- Detect fraud or misuse of credit.
- Collaborate with product and risk teams.
- Optimize approval rates while controlling risk.

Required Skills:

- Consumer lending knowledge
- Behavioral risk analysis
- Data-driven decision-making

Qualification:

- Graduate / MBA Finance
- 2–5 years in consumer lending/fintech

---

54. Fintech Underwriting Analyst

Job Summary:

Responsible for digital underwriting decisions using automated systems and data-driven risk models.

Key Responsibilities:

- Review algorithm-generated credit decisions.
- Assess income and employment verification digitally.
- Conduct manual review for flagged cases.
- Ensure compliance with digital lending norms.
- Recommend approval, modification, or rejection.
- Monitor underwriting performance metrics.
- Work with tech team to enhance decision engines.

Required Skills:

- Underwriting expertise
- Risk analysis capability
- Knowledge of digital KYC & AML
- Strong decision-making skills

Qualification:

- MBA Finance / Graduate
- 2–5 years in underwriting or digital lending

55. Alternative Data Credit Analyst

Job Summary:

Uses non-traditional data sources (social data, transaction data, mobile usage, GST data, etc.) to assess borrower creditworthiness.

Key Responsibilities:

- Analyze alternative datasets for risk prediction.
- Develop new risk variables from digital footprints.
- Validate predictive accuracy of alternative data models.
- Collaborate with data science teams.
- Identify fraud and credit risk anomalies.
- Improve financial inclusion through data innovation.

Required Skills:

- Data analytics & statistical modeling
- Knowledge of alternative credit scoring
- Python / SQL preferred
- Strong analytical mindset

Qualification:

- MBA Finance / Data Science / Engineering
- 3–6 years in fintech analytics

56. Project Finance Credit Specialist

Job Summary:

Responsible for evaluating large, capital-intensive projects (power, roads, telecom, renewable energy, etc.) by assessing long-term cash flows, project viability, and associated risks.

Key Responsibilities:

- Analyze project feasibility reports and DPRs.

- Build and review project finance models (NPV, IRR, DSCR).
- Evaluate sponsor strength and equity contribution.
- Assess construction, operational, and regulatory risks.
- Conduct sensitivity and scenario analysis.
- Structure debt repayment schedules aligned with project cash flows.
- Monitor project milestones and compliance post-disbursement.

Required Skills:

- Advanced financial modeling
- Strong understanding of project finance structures
- Risk identification and mitigation
- Infrastructure sector knowledge

Qualification:

- MBA Finance / CA / CFA
- 5–10 years in project or infrastructure finance

---

57. Real Estate Credit Analyst

Job Summary:

Evaluates credit risk related to real estate developers, housing projects, and commercial property financing.

Key Responsibilities:

- Analyze developer financials and project cash flows.
- Assess property valuation and collateral adequacy.
- Evaluate sales projections and absorption rates.
- Review regulatory approvals and legal clearances.
- Monitor project progress and escrow accounts.
- Conduct site visits and market research.

Required Skills:

- Real estate market knowledge
- Cash flow forecasting
- Risk assessment of property-backed loans
- Legal documentation awareness

Qualification:

- MBA Finance / CA Inter
- 3–8 years in real estate lending

---

58. Aviation Finance Credit Analyst

Job Summary:

Assesses credit risk associated with aircraft leasing, airline financing, and aviation-related assets.

Key Responsibilities:

- Analyze airline financial statements.
- Evaluate lease agreements and aircraft valuation.
- Assess global aviation market risks.
- Review fuel price exposure and operational risks.
- Monitor credit ratings of airline clients.
- Structure aircraft-backed financing.

Required Skills:

- Aviation sector knowledge
- Asset valuation understanding
- International risk analysis
- Strong financial modeling skills

Qualification:

- MBA Finance / CFA
- 4–8 years in aviation or asset finance

---

59. Infrastructure Credit Analyst

Job Summary:

Evaluates long-term financing proposals for infrastructure sectors such as energy, transport, water, and telecom.

Key Responsibilities:

- Conduct sector-specific risk analysis.
- Review concession agreements and government contracts.
- Assess funding structures and repayment models.
- Perform stress testing under economic scenarios.
- Evaluate regulatory and environmental risks.
- Prepare infrastructure credit assessment reports.

Required Skills:

- Infrastructure financing knowledge
- Risk modeling & sensitivity analysis
- Regulatory understanding
- Strong analytical ability

Qualification:

- MBA Finance / CA / CFA
- 4–10 years in infrastructure finance

---

60. Supply Chain Finance Credit Analyst

Job Summary:

Analyzes credit risk within supply chain financing structures, including vendor financing and receivable discounting.

Key Responsibilities:

- Evaluate anchor company financial strength.
- Assess supplier creditworthiness.
- Analyze receivables and payment cycles.
- Monitor transaction flows and exposure limits.
- Identify operational and fraud risks.
- Structure working capital financing solutions.

Required Skills:

- Working capital assessment
- Trade finance knowledge
- Risk analytics
- Understanding of supply chain cycles

Qualification:

- MBA Finance / CA Inter
- 3–7 years in trade/supply chain finance

---

61. Microfinance Credit Analyst

Job Summary:

Assesses credit risk for small-ticket loans provided to low-income individuals and micro-entrepreneurs.

Key Responsibilities:

- Evaluate borrower group lending models.
- Assess repayment behavior patterns.
- Monitor portfolio delinquency trends.
- Conduct field visits and borrower verification.
- Identify geographic and demographic risks.
- Support financial inclusion initiatives.

Required Skills:

- Knowledge of microfinance models
- Risk monitoring
- Field assessment capability
- Strong analytical and reporting skills

Qualification:

- Graduate / MBA Finance
- 2–6 years in microfinance institutions

---

62. Agricultural Credit Officer

Job Summary:

Evaluates agricultural loan proposals for farmers, agribusinesses, and rural enterprises.

Key Responsibilities:

- Assess crop cycles and seasonal income patterns.
- Evaluate land ownership and collateral security.
- Analyze government subsidy schemes.
- Monitor agricultural risk factors (weather, commodity prices).
- Conduct field visits and borrower assessments.
- Ensure compliance with rural lending norms.

Required Skills:

- Knowledge of agricultural finance
- Risk assessment in rural markets
- Field evaluation skills
- Understanding of government schemes

Qualification:

- Graduate in Agriculture / Commerce / MBA Finance
- 2–6 years in rural banking

---

63. Export Credit Analyst

Job Summary:

Assesses credit risk for export-oriented businesses and international trade financing.

Key Responsibilities:

- Analyze exporter financial statements.
- Assess foreign buyer and country risk.
- Evaluate export contracts and payment terms.
- Monitor currency risk exposure.
- Review trade finance instruments (LC, BG).
- Ensure compliance with export credit regulations.

Required Skills:

- International trade finance knowledge
- Country risk analysis
- Forex risk awareness
- Strong analytical ability

Qualification:

- MBA Finance / Commerce Graduate
- 3–7 years in export/trade finance

64. Credit Audit Analyst

Job Summary:

Responsible for conducting independent audits of credit processes, loan files, and risk assessments to ensure adherence to internal policies and regulatory standards.

Key Responsibilities:

- Perform periodic audits of credit proposals and sanctioned loans.
- Review compliance with internal credit policies.
- Assess adequacy of risk ratings and documentation.
- Identify process gaps and control weaknesses.
- Prepare audit findings and recommendations.
- Coordinate with credit and risk teams for corrective actions.
- Monitor implementation of audit recommendations.

Required Skills:

- Strong knowledge of credit appraisal processes
- Audit and risk assessment skills
- Attention to detail
- Report writing ability

Qualification:

- CA / MBA Finance / CPA
- 3–7 years in credit audit or internal audit

---

65. Credit Quality Assurance (QA) Analyst

Job Summary:

Ensures the quality and consistency of credit underwriting decisions by reviewing loan assessments and identifying deviations.

Key Responsibilities:

- Review approved and rejected loan files.
- Identify deviations from underwriting standards.
- Evaluate accuracy of financial analysis and risk grading.
- Prepare quality scorecards and performance metrics.
- Provide feedback to underwriting teams.
- Recommend process improvements to reduce errors.

Required Skills:

- Knowledge of underwriting guidelines
- Analytical review skills
- Process improvement mindset
- Strong documentation skills

Qualification:

- MBA Finance / CA Inter

- 3–6 years in underwriting or credit review

---

66. Credit Compliance Officer

Job Summary:

Ensures that credit operations comply with regulatory requirements and internal risk policies.

Key Responsibilities:

- Monitor compliance with RBI/regulatory guidelines.
- Review loan documentation for policy adherence.
- Track policy exceptions and breaches.
- Conduct compliance risk assessments.
- Prepare compliance reports for senior management.
- Coordinate with regulators and auditors during inspections.

Required Skills:

- Regulatory knowledge (RBI/Basel norms)
- Strong understanding of credit policies
- Risk assessment capability
- Excellent communication skills

Qualification:

- MBA Finance / CA / LLB (preferred)
- 4–8 years in compliance or credit risk

---

67. Loan Review Auditor

Job Summary:

Conducts independent post-disbursement reviews of loan accounts to evaluate asset quality and risk exposure.

Key Responsibilities:

- Review loan documentation and sanction terms.
- Assess borrower performance and covenant compliance.
- Identify early warning signals (EWS).
- Evaluate accuracy of risk classification (NPA tagging).
- Prepare asset quality review (AQR) reports.

- Recommend corrective measures for weak accounts.

Required Skills:

- Asset quality assessment
- Credit risk evaluation
- Audit methodology knowledge
- Strong analytical ability

Qualification:

- CA / MBA Finance
- 4–8 years in loan review or audit

---

68. Internal Credit Control Analyst

Job Summary:

Monitors internal controls within the credit department to prevent fraud, policy breaches, and operational risks.

Key Responsibilities:

- Evaluate effectiveness of internal credit controls.
- Review process compliance across branches.
- Monitor limit utilization and exposure breaches.
- Identify operational risk gaps.
- Conduct control testing and validation.
- Recommend enhancements to risk control framework.

Required Skills:

- Internal control knowledge
- Risk and compliance expertise
- Data analysis skills
- Strong investigative mindset

Qualification:

- MBA Finance / CA Inter / FRM (preferred)
- 3–7 years in risk control or internal audit

---

69. Regulatory Reporting Analyst (Credit)

Job Summary:

Responsible for preparing and submitting regulatory credit reports in compliance with statutory and supervisory requirements.

Key Responsibilities:

- Prepare regulatory reports (RBI, Basel, IFRS 9 disclosures).
- Calculate risk-weighted assets (RWA).
- Ensure accurate credit exposure reporting.
- Coordinate with finance and risk departments.
- Validate data integrity before submission.
- Support regulatory inspections and audits.

Required Skills:

- Knowledge of regulatory frameworks (Basel II/III, IFRS 9)
- Strong data and reporting skills
- Attention to accuracy and compliance
- Advanced Excel and reporting tools

Qualification:

- CA / MBA Finance / FRM
- 3–7 years in regulatory reporting or risk reporting

70. Lead Credit Analyst

Job Summary:

Leads complex credit evaluations, supervises junior analysts, and supports credit decision-making for high-value or high-risk transactions.

Key Responsibilities:

- Review and approve detailed credit analysis reports.
- Evaluate large or complex borrower proposals.
- Mentor and guide junior credit analysts.
- Participate in credit committee discussions.
- Ensure adherence to credit policies and risk frameworks.
- Monitor portfolio performance and risk exposure.
- Recommend risk mitigation strategies.

Required Skills:

- Advanced financial analysis
- Strong risk judgment
- Leadership & mentoring ability
- Decision-making skills

Qualification:

- MBA Finance / CA / CFA
- 6–10 years in credit analysis

---

71. Credit Manager

Job Summary:

Manages credit evaluation processes and ensures balanced risk and business growth within assigned portfolios or regions.

Key Responsibilities:

- Oversee credit appraisal and underwriting.
- Approve loans within delegated authority.
- Monitor portfolio quality and delinquency trends.
- Implement credit risk controls.
- Coordinate with sales and relationship teams.
- Present credit cases to higher authority when required.

Required Skills:

- Strong credit structuring skills
- Risk management expertise
- Team leadership
- Policy knowledge

Qualification:

- MBA Finance / CA
- 7–12 years in banking/NBFC credit roles

---

72. Senior Credit Manager

Job Summary:

Provides strategic oversight of credit functions across multiple teams or branches and ensures asset quality and regulatory compliance.

Key Responsibilities:

- Supervise credit managers and underwriting teams.
- Review large-ticket and high-risk proposals.
- Develop credit strategies aligned with business goals.
- Monitor portfolio concentration and exposure risks.
- Lead credit review and policy updates.
- Report portfolio performance to senior management.

Required Skills:

- Strategic risk management
- Strong leadership capability
- Advanced credit structuring
- Portfolio oversight expertise

Qualification:

- MBA Finance / CA / CFA
- 10–15 years in credit leadership roles

---

73. Head of Credit

Job Summary:

Leads the overall credit function of the organization, ensuring sustainable growth, strong asset quality, and compliance with regulations.

Key Responsibilities:

- Develop and implement credit risk strategy.
- Set credit policies and approval frameworks.
- Chair or participate in credit committees.
- Monitor portfolio health and NPA trends.
- Ensure compliance with regulatory guidelines.
- Collaborate with business heads to balance risk and growth.
- Oversee credit risk reporting to board/executive team.

Required Skills:

- Strategic leadership
- Deep credit and risk expertise
- Regulatory and governance knowledge

- Strong decision-making ability

Qualification:

- MBA Finance / CA / CFA
- 15+ years in senior credit roles

---

74. Director – Credit Risk

Job Summary:

Responsible for overseeing enterprise-wide credit risk management and ensuring alignment with corporate risk appetite.

Key Responsibilities:

- Define risk appetite framework.
- Oversee credit risk modeling and stress testing.
- Ensure Basel and regulatory compliance.
- Review capital adequacy related to credit risk.
- Present risk insights to board and regulators.
- Lead risk transformation initiatives.

Required Skills:

- Enterprise risk management expertise
- Regulatory knowledge (Basel III/IFRS 9)
- Strong leadership & governance skills
- Quantitative risk understanding

Qualification:

- MBA Finance / FRM / CA
- 15–20+ years in credit risk management

---

75. Chief Credit Officer (CCO)

Job Summary:

The senior-most executive responsible for overseeing the entire credit function, risk governance, and asset quality management of the organization.

Key Responsibilities:

- Set overall credit risk strategy and policies.
- Approve high-value and strategic credit exposures.
- Ensure portfolio diversification and risk mitigation.
- Lead credit committees and board discussions.
- Monitor asset quality, provisioning, and capital adequacy.
- Maintain regulatory and stakeholder confidence.
- Drive sustainable lending growth.

Required Skills:

- Executive leadership
- Deep risk & credit expertise
- Strategic decision-making
- Strong governance & compliance knowledge

Qualification:

- MBA Finance / CA / CFA / FRM
- 20+ years in banking or financial services

---

76. VP – Credit Risk

Job Summary:

Oversees credit risk management operations and ensures alignment with organizational risk appetite and regulatory standards.

Key Responsibilities:

- Supervise credit risk teams.
- Oversee portfolio analytics and risk reporting.
- Manage credit policy updates.
- Review stress testing and provisioning analysis.
- Present risk metrics to executive management.
- Drive risk culture across organization.

Required Skills:

- Portfolio risk management
- Strong analytical and leadership skills
- Regulatory expertise

Qualification:

- MBA Finance / FRM / CFA
- 12–18 years in credit risk

---

77. AVP – Credit Underwriting

Job Summary:

Leads underwriting operations and ensures high-quality credit evaluation for assigned portfolios.

Key Responsibilities:

- Supervise underwriting teams.
- Approve loans within authority limits.
- Monitor underwriting accuracy and turnaround time.
- Ensure adherence to credit policy.
- Identify process improvement opportunities.
- Report underwriting performance metrics.

Required Skills:

- Underwriting expertise
- Team management
- Risk assessment capability
- Operational efficiency management

Qualification:

- MBA Finance / CA Inter
- 8–15 years in underwriting roles

---

78. Credit Portfolio Head

Job Summary:

Responsible for managing overall credit portfolio performance, ensuring profitability while maintaining risk within defined limits.

Key Responsibilities:

- Monitor portfolio concentration and exposure limits.
- Analyze NPA, delinquency, and loss trends.
- Implement portfolio diversification strategies.
- Optimize risk-adjusted returns.
- Conduct portfolio stress testing.
- Present portfolio performance to executive leadership.

Required Skills:

- Portfolio analytics expertise
- Strategic risk management
- Data-driven decision-making
- Strong financial acumen

Qualification:

- MBA Finance / CFA / FRM
- 12–18+ years in credit and portfolio management

79. Credit & Financial Analyst

Job Summary

The Credit & Financial Analyst evaluates borrower creditworthiness while also performing broader financial analysis including budgeting, forecasting, and financial performance review. This hybrid role supports lending and corporate finance decisions.

Key Responsibilities

- Analyze financial statements (P&L, Balance Sheet, Cash Flow)
- Perform credit risk assessment and prepare credit memos
- Conduct ratio analysis, cash flow projections, and scenario modeling
- Support budgeting and forecasting processes
- Evaluate working capital and liquidity position
- Assist in loan structuring and covenant analysis
- Monitor borrower financial performance post-disbursement
- Prepare management reports and credit dashboards

Required Skills

- Financial statement analysis
- Credit appraisal and underwriting knowledge
- Financial modeling (Excel)
- Risk assessment techniques
- Analytical and problem-solving skills

Qualifications

- B.Com / BBA / MBA (Finance) / CA Inter
- 1–5 years of experience in credit or financial analysis

---

80. Risk & Portfolio Analyst

Job Summary

Responsible for monitoring overall credit portfolio risk, identifying concentration risks, and supporting risk mitigation strategies.

Key Responsibilities

- Monitor portfolio performance (NPAs, delinquency ratios)
- Analyze sectoral and geographic risk exposure
- Conduct stress testing and scenario analysis
- Prepare risk dashboards and MIS reports
- Track early warning signals (EWS)
- Support portfolio diversification strategies
- Assist in capital adequacy and provisioning analysis

Required Skills

- Portfolio analytics
- Risk modeling basics
- Advanced Excel / SQL
- Knowledge of Basel norms

Qualifications

- MBA Finance / FRM preferred
- 2–6 years in credit risk or portfolio analytics

---

81. Credit & Collections Manager

Job Summary

Manages credit approvals and recovery strategies while ensuring timely collections and minimizing bad debts.

Key Responsibilities

- Approve credit limits and review borrower exposure
- Develop collection strategies and recovery plans
- Monitor overdue accounts and delinquency buckets
- Coordinate with legal and recovery teams
- Optimize DSO (Days Sales Outstanding)
- Develop risk-based collection policies
- Supervise credit control team

Required Skills

- Credit risk management
- Collection strategy planning
- Negotiation & communication skills
- Legal recovery knowledge

Qualifications

- MBA Finance / CA Inter
- 5–10 years in credit & collections

---

82. Treasury & Credit Analyst

Job Summary

Supports treasury operations while evaluating counterparty credit risk and managing liquidity exposure.

Key Responsibilities

- Monitor liquidity and cash flow positions
- Assess counterparty and bank credit risk
- Analyze debt instruments and borrowing structures
- Support hedging and risk mitigation strategies
- Prepare treasury and exposure reports
- Monitor interest rate and market risk impact

Required Skills

- Treasury management
- Fixed income analysis
- Credit evaluation
- Financial modeling

Qualifications

- MBA Finance / CFA Level 1 preferred
- 2–6 years in treasury or credit risk

---

83. Structured Products Analyst

Job Summary

Analyzes complex structured credit products such as securitizations, derivatives, and asset-backed securities.

Key Responsibilities

- Evaluate structured finance transactions
- Analyze SPVs and securitization pools
- Model cash flow waterfalls
- Assess tranche risk and rating implications
- Conduct scenario and stress testing
- Support deal structuring and documentation

Required Skills

- Advanced financial modeling
- Knowledge of ABS, MBS, CDOs
- Structured finance concepts
- Risk analytics

Qualifications

- MBA Finance / CFA preferred
- 3–7 years in structured finance

---

84. Ratings Analyst (Credit Rating Agencies – CRISIL, ICRA, CARE)

Job Summary

Responsible for evaluating companies and debt instruments to assign credit ratings.

Key Responsibilities

- Conduct detailed company and industry analysis
- Evaluate financial strength and business risk
- Prepare rating reports and committee notes
- Interact with company management
- Monitor rated instruments periodically
- Assess default risk and recovery prospects

Required Skills

- Strong financial analysis
- Industry research
- Report writing
- Presentation skills

Qualifications

- MBA Finance / CA / CFA preferred
- 1–5 years in credit analysis or rating

---

85. Financial Risk Analyst

Job Summary

Analyzes financial risks including credit, market, and liquidity risk to support enterprise risk management.

Key Responsibilities

- Identify and quantify financial risks
- Conduct VaR and stress testing analysis
- Monitor credit exposure limits
- Prepare risk reports for management
- Support capital planning and regulatory compliance
- Assist in model validation and risk framework implementation

Required Skills

- Risk modeling
- Statistical analysis
- Knowledge of Basel III & IFRS 9
- Excel / Python / SQL

Qualifications

- MBA Finance / FRM / CFA preferred
- 2–6 years in financial risk management

Industries Hiring Credit Analysts – Detailed Job Descriptions

---

86. Commercial Banks – Credit Analyst

Job Summary

Credit Analysts in commercial banks assess loan applications from individuals, SMEs, and corporates to evaluate creditworthiness and recommend loan approvals or rejections.

Key Responsibilities

- Analyze borrower financial statements and credit history
- Conduct ratio analysis, cash flow forecasting, and repayment capacity assessment
- Prepare detailed credit appraisal notes
- Evaluate collateral and security coverage
- Assess industry and sector risk
- Recommend loan structuring (tenure, pricing, covenants)
- Monitor post-disbursement credit performance
- Ensure compliance with RBI and internal policies

Required Skills

- Financial statement analysis
- Loan underwriting
- Risk assessment
- Knowledge of banking regulations
- Strong analytical and documentation skills

Qualifications

- B.Com / MBA (Finance) / CA Inter
- 1–5+ years in banking credit

---

87. Investment Banks – Credit Analyst

Job Summary

Responsible for evaluating corporate debt instruments, leveraged finance deals, and credit exposure in capital markets transactions.

Key Responsibilities

- Perform in-depth credit analysis for bond issuances
- Evaluate leverage ratios and capital structures
- Conduct covenant and debt servicing analysis
- Analyze merger & acquisition financing risk
- Prepare pitch books and credit memos
- Support debt capital markets transactions
- Monitor high-yield and leveraged loan portfolios

Required Skills

- Advanced financial modeling
- Capital markets knowledge
- Strong analytical and presentation skills
- Understanding of structured finance

Qualifications

- MBA Finance / CFA preferred
- 2–6 years in investment banking or credit research

---

88. NBFCs (Non-Banking Financial Companies) – Credit Analyst

Job Summary

Assess retail, SME, vehicle, or consumer loan applications and manage credit risk exposure for NBFC lending portfolios.

Key Responsibilities

- Evaluate borrower repayment capacity
- Analyze income proofs and bank statements
- Conduct field investigation (if required)
- Recommend loan amount and pricing
- Monitor portfolio delinquency
- Implement internal risk policies
- Work closely with sales and operations teams

Required Skills

- Retail and SME credit appraisal
- Risk grading models
- Documentation review
- Portfolio monitoring

Qualifications

- Graduate / MBA Finance
- 1–4 years in NBFC or lending institution

---

89. Microfinance Institutions – Credit Analyst

Job Summary

Evaluate small-ticket loans provided to rural and low-income borrowers while ensuring financial inclusion objectives.

Key Responsibilities

- Assess borrower income and repayment capacity
- Conduct group-based lending analysis
- Evaluate micro-enterprise viability
- Monitor field-level credit risk

- Track portfolio at risk (PAR)
- Ensure compliance with microfinance regulations

Required Skills

- Rural credit assessment
- Risk monitoring
- Strong field coordination skills
- Understanding of financial inclusion models

Qualifications

- Graduate / MBA Finance
- Experience in rural lending preferred

---

90. Fintech Companies – Digital Credit Analyst

Job Summary

Analyze digital borrower data using technology-driven models to approve instant loans and manage digital lending risk.

Key Responsibilities

- Assess alternative data (bank feeds, transaction history)
- Work with credit scoring algorithms
- Monitor digital loan portfolio risk
- Detect fraud and anomalies
- Optimize credit approval models
- Collaborate with data science teams

Required Skills

- Data analytics (Excel/SQL/Python preferred)
- Understanding of algorithm-based underwriting
- Knowledge of BNPL and consumer lending
- Risk modeling

Qualifications

- MBA Finance / Data Analytics
- 1–5 years in fintech or digital lending

---

91. Credit Rating Agencies – Ratings Analyst

Job Summary

Evaluate companies and debt instruments to assign credit ratings reflecting default risk.

Key Responsibilities

- Analyze business risk and financial strength
- Conduct industry research
- Interact with management teams
- Prepare rating notes and presentations
- Monitor rated entities periodically
- Recommend rating upgrades/downgrades

Required Skills

- Strong financial analysis
- Industry research capability
- Report writing
- Analytical thinking

Qualifications

- CA / MBA Finance / CFA preferred
- 1–5 years in credit analysis or research

---

92. Corporate Treasury Departments – Corporate Credit Analyst

Job Summary

Manage counterparty credit risk and assess customers, suppliers, and financial institutions dealing with the company.

Key Responsibilities

- Evaluate customer credit risk and set credit limits
- Assess counterparty banks and financial institutions
- Monitor receivables and exposure
- Support working capital planning
- Analyze debt financing structures
- Assist in liquidity and risk planning

Required Skills

- Corporate finance knowledge
- Working capital management

- Credit limit assessment
- Treasury operations understanding

Qualifications

- MBA Finance / CA Inter
- 2–6 years in corporate finance or treasury

---

93. Insurance Companies – Credit Risk Analyst

Job Summary

Evaluate credit risk of investment portfolios and debt securities held by insurance companies.

Key Responsibilities

- Analyze bonds and fixed income investments
- Assess issuer creditworthiness
- Monitor investment risk exposure
- Ensure regulatory compliance (IRDA guidelines)
- Conduct stress testing on portfolios
- Support asset-liability management

Required Skills

- Fixed income analysis
- Risk management
- Knowledge of insurance regulations
- Financial modeling

Qualifications

- MBA Finance / CFA preferred
- 2–6 years in credit or investment analysis

---

94. Asset Management Companies (AMCs) – Fixed Income Credit Analyst

Job Summary

Assess corporate bonds, debentures, and other fixed income instruments for mutual fund portfolios.

Key Responsibilities

- Conduct in-depth credit research

- Recommend investment or avoidance decisions
- Monitor bond portfolio performance
- Evaluate default and downgrade risk
- Prepare investment notes
- Track macroeconomic and industry trends

Required Skills

- Bond valuation
- Yield and duration analysis
- Credit research expertise
- Market awareness

Qualifications

- MBA Finance / CFA preferred
- 2–7 years in credit research or asset management
