

1. Equity Research Trainee

Role Overview

An Equity Research Trainee supports senior analysts in analyzing listed companies, preparing financial models, and assisting in equity research reports. This role focuses on learning valuation techniques, stock analysis, and capital market fundamentals.

Key Responsibilities

- Assist in collecting financial data from annual reports, investor presentations, and stock exchange filings
- Support financial modeling (basic income statement, balance sheet, cash flow)
- Track company news, earnings announcements, and corporate actions
- Help prepare draft equity research notes and presentations
- Maintain databases of covered companies and sectors
- Learn valuation methods such as DCF, P/E, EV/EBITDA

Skills & Qualifications

- Bachelor's degree in Finance, Accounting, Economics, or related field
- Strong understanding of financial statements
- Basic Excel and PowerPoint skills
- Interest in stock markets and equity research
- CFA Level 1 (appeared/pursuing) preferred

Career Progression

Equity Research Analyst → Senior Analyst

2. Junior Equity Research Analyst

Role Overview

A Junior Equity Research Analyst performs fundamental analysis of companies and assists in stock recommendations under the guidance of senior analysts.

Key Responsibilities

- Analyze financial statements and business models
- Build and update financial valuation models
- Perform peer comparison and ratio analysis
- Prepare company initiation and quarterly update reports
- Monitor market trends and sector performance
- Support senior analysts during earnings calls and management interactions

Skills & Qualifications

- Degree in Finance, CA (Inter), CMA (Inter), MBA Finance preferred
- Strong Excel-based financial modeling skills
- Knowledge of valuation techniques and equity markets
- Good written and verbal communication

Career Progression

Senior Equity Research Analyst → Lead Analyst

3. Research Analyst – Equities

Role Overview

The Research Analyst – Equities evaluates publicly listed companies to provide research insights and investment recommendations for internal teams or clients.

Key Responsibilities

- Conduct fundamental and financial analysis of equity stocks
- Prepare research reports with buy/sell/hold recommendations
- Perform industry and competitor analysis
- Track macroeconomic and sector developments
- Maintain valuation models and update assumptions
- Coordinate with sales or portfolio teams

Skills & Qualifications

- Bachelor's or Master's in Finance / Economics
- Strong analytical and research skills
- Proficiency in Excel, financial databases, and presentations
- SEBI Research Analyst certification (for client-facing roles)

Career Progression

Senior Analyst → Equity Research Lead

4. Investment Research Associate

Role Overview

An Investment Research Associate supports investment decisions by conducting research across equities, sectors, and market trends.

Key Responsibilities

- Research companies, industries, and investment themes
- Assist in investment memos and pitch decks
- Analyze financial performance and growth drivers
- Support portfolio managers and investment committees
- Track portfolio performance and risk metrics

Skills & Qualifications

- Degree in Finance, Economics, or MBA Finance
- Strong financial analysis and presentation skills
- Understanding of portfolio management concepts
- CFA Level 1 or Level 2 preferred

Career Progression

Investment Analyst → Portfolio Manager

5. Capital Markets Analyst

Role Overview

A Capital Markets Analyst analyzes equity market trends, IPOs, and secondary market opportunities to support investment and advisory teams.

Key Responsibilities

- Track equity markets, indices, and capital market activity
- Assist in IPO, FPO, and rights issue analysis
- Prepare market outlook and sector reports
- Analyze valuation of newly listed companies
- Monitor regulatory developments and market movements
