

1. Financial Analyst

Role Summary

The Financial Analyst is responsible for analyzing financial data, preparing reports, and supporting business decision-making through insights on performance, trends, and forecasts.

Key Responsibilities

- Analyze financial statements, budgets, and operational data
- Prepare monthly, quarterly, and annual financial reports
- Assist in budgeting, forecasting, and variance analysis
- Track KPIs and financial performance metrics
- Support management with ad-hoc financial analysis
- Maintain financial models and spreadsheets
- Collaborate with accounting and business teams

Skills & Competencies

- Strong analytical and problem-solving skills
- Proficiency in MS Excel (formulas, pivots, dashboards)
- Basic financial modeling knowledge
- Understanding of P&L, Balance Sheet, Cash Flow
- Attention to detail and accuracy

Tools & Technologies

- MS Excel, Google Sheets
- Power BI / Tableau (basic)
- ERP systems (SAP, Oracle, Tally, etc.)

Qualifications

- Bachelor's degree in Finance, Accounting, Economics, or related field
- CA Inter / CMA Inter / MBA (Finance) – preferred

Experience

- 1–3 years in finance, accounting, or analysis roles

2. Junior Financial Analyst

Role Summary

The Junior Financial Analyst supports senior team members by collecting data, preparing basic reports, and assisting in financial analysis tasks.

Key Responsibilities

- Collect, clean, and organize financial data
- Prepare basic financial reports and dashboards
- Assist in budgeting and forecasting activities
- Support variance analysis and cost tracking
- Maintain financial databases and documentation
- Assist in month-end and year-end processes

Skills & Competencies

- Strong numerical and logical skills
- Basic knowledge of finance and accounting concepts
- Willingness to learn financial modeling
- Good communication and teamwork skills

Tools & Technologies

- MS Excel / Google Sheets
- Basic Power BI or Tableau
- Accounting software (basic exposure)

Qualifications

- Bachelor's degree in Commerce, Finance, or Economics
- CA / CMA / MBA (Finance) students or freshers preferred

Experience

- Fresher to 1 year (internship experience acceptable)
-

3. Senior Financial Analyst

Role Summary

The Senior Financial Analyst leads complex financial analysis, forecasting, and strategic insights, acting as a key advisor to management.

Key Responsibilities

- Lead budgeting, forecasting, and long-term planning
- Build and maintain advanced financial models
- Perform detailed variance and profitability analysis

- Provide strategic insights for business decisions
- Review and validate junior analysts' work
- Present financial insights to senior management
- Support M&A, investment, or expansion analysis

Skills & Competencies

- Advanced financial modeling and forecasting skills
- Strong business acumen and strategic thinking
- Excellent presentation and stakeholder communication
- Ability to work independently and lead projects

Tools & Technologies

- Advanced Excel (Power Query, macros preferred)
- Power BI / Tableau
- ERP & Financial Planning tools

Qualifications

- MBA (Finance), CA, CMA, CFA preferred

Experience

- 4–7 years in financial analysis or corporate finance

4. Lead Financial Analyst

Role Summary

The Lead Financial Analyst manages a team of analysts and ensures high-quality financial analysis aligned with organizational strategy.

Key Responsibilities

- Lead and mentor financial analyst teams
- Oversee budgeting, forecasting, and financial planning
- Review complex financial models and assumptions
- Partner with leadership on strategic initiatives
- Drive process improvements and automation
- Ensure accuracy and compliance in financial reporting
- Act as key liaison between finance and business units

Skills & Competencies

- Strong leadership and people management skills

- Expert-level financial analysis and modeling
- Strategic mindset with operational understanding
- High-level communication and decision-making ability

Tools & Technologies

- Excel (advanced), Power BI / Tableau
- ERP systems and FP&A tools
- Automation tools (Power Automate, VBA, SQL – preferred)

Qualifications

- CA / CMA / MBA (Finance) / CFA

Experience

- 7–10 years in financial analysis with leadership exposure
-

5. Principal Financial Analyst

Role Summary

The Principal Financial Analyst is a senior expert role responsible for driving enterprise-level financial strategy, advanced analytics, and executive decision support.

Key Responsibilities

- Design enterprise-wide financial models and frameworks
- Provide high-impact insights to CXOs and Board members
- Lead strategic planning, scenario modeling, and valuation
- Support major investments, M&A, and restructuring decisions
- Define financial governance and best practices
- Mentor senior and lead analysts
- Influence long-term financial strategy and growth

Skills & Competencies

- Exceptional strategic and analytical expertise
- Deep understanding of business, markets, and finance
- Executive-level communication and storytelling
- High judgment, influence, and decision-making capability

Tools & Technologies

- Advanced modeling tools
- BI platforms and forecasting systems

- Data analytics tools (SQL, Python – preferred)

Qualifications

- CA / CFA / MBA (Finance) – strongly preferred

Experience

- 10–15+ years in financial analysis, strategy, or advisory roles

6. Corporate Financial Analyst

Role Summary

Responsible for analyzing the company's overall financial performance and supporting strategic corporate decisions through financial insights, reporting, and forecasting.

Key Responsibilities

- Analyze financial statements, cash flows, and corporate KPIs
- Support corporate budgeting and long-term financial planning
- Perform variance analysis and trend analysis
- Prepare management and board-level financial reports
- Support investment evaluation and capital allocation decisions
- Coordinate with accounting, treasury, and business teams

Skills & Competencies

- Strong financial statement analysis
- Business and commercial understanding
- Analytical and presentation skills

Tools

- Advanced Excel, Power BI / Tableau
- ERP systems (SAP, Oracle, NetSuite)

Qualifications & Experience

- MBA (Finance) / CA / CMA preferred
 - 2–5 years corporate finance experience
-

7. Business Finance Analyst

Role Summary

Acts as a finance business partner to operating teams, translating financial data into actionable business insights.

Key Responsibilities

- Partner with business units on planning and performance
- Analyze revenue, costs, and profitability by product or segment
- Support pricing, discounting, and investment decisions
- Track operational KPIs and unit economics
- Support budget ownership for business teams

Skills & Competencies

- Strong business partnering and communication
- Financial modeling and scenario analysis
- Commercial decision support

Tools

- Excel, Power BI
- CRM & ERP integrations

Qualifications & Experience

- MBA (Finance) / CA / CMA
 - 3–6 years in business finance or FP&A
-

8. Strategic Finance Analyst

Role Summary

Focuses on long-term financial strategy, growth initiatives, and high-impact decision-making for leadership.

Key Responsibilities

- Develop long-term strategic and financial plans
- Build scenario and sensitivity models
- Evaluate expansion, M&A, and investment opportunities
- Support CXO-level strategic initiatives
- Conduct market, competitor, and ROI analysis

Skills & Competencies

- Strategic thinking and storytelling
- Advanced modeling and valuation
- Executive communication

Tools

- Excel (advanced), Power BI
- Strategy & forecasting tools

Qualifications & Experience

- CA / CFA / MBA (Finance) preferred
 - 4–8 years in strategy or corporate finance
-

9. FP&A Analyst (Financial Planning & Analysis)

Role Summary

Owns budgeting, forecasting, performance analysis, and management reporting to support business planning and financial control.

Key Responsibilities

- Prepare annual budgets and rolling forecasts
- Perform variance analysis (actual vs budget/forecast)
- Build and maintain FP&A financial models
- Prepare monthly management dashboards
- Support decision-making through financial insights

Skills & Competencies

- Strong FP&A concepts and modeling
- Attention to detail and deadline management
- Stakeholder coordination

Tools

- Excel (advanced), Power BI / Tableau
- FP&A tools (Anaplan, Adaptive, Hyperion)

Qualifications & Experience

- MBA (Finance) / CA / CMA
 - 2–6 years FP&A experience
-

10. Budget Analyst

Role Summary

Responsible for budget preparation, monitoring, and control to ensure efficient use of organizational resources.

Key Responsibilities

- Develop departmental and organizational budgets
- Monitor budget utilization and controls
- Analyze budget variances and recommend actions
- Support cost optimization initiatives
- Ensure budget compliance and documentation

Skills & Competencies

- Budgeting and cost control expertise
- Strong analytical and coordination skills

Tools

- Excel, Budgeting software
- ERP systems

Qualifications & Experience

- Bachelor's / MBA (Finance)
 - 2–5 years budgeting experience
-

11. Cost Analyst

Role Summary

Analyzes cost structures to improve efficiency, control expenses, and enhance profitability.

Key Responsibilities

- Analyze fixed and variable costs
- Conduct product and process cost analysis

- Support cost reduction and efficiency projects
- Develop cost allocation models
- Work with operations and procurement teams

Skills & Competencies

- Cost accounting and analysis
- Process improvement mindset

Tools

- Excel, Costing modules in ERP
- Power BI

Qualifications & Experience

- CMA / CA / MBA (Finance)
 - 3–6 years in cost analysis or manufacturing finance
-

12. Profitability Analyst

Role Summary

Focuses on measuring and improving profitability across products, customers, and business segments.

Key Responsibilities

- Analyze profitability by product, customer, and channel
- Identify margin improvement opportunities
- Support pricing and cost optimization decisions
- Develop profitability dashboards
- Collaborate with sales and operations teams

Skills & Competencies

- Strong margin and contribution analysis
- Commercial and analytical thinking

Tools

- Excel, Power BI
- ERP & sales data systems

Qualifications & Experience

- MBA (Finance) / CA / CMA
 - 3–7 years profitability analysis experience
-

13. Revenue Analyst

Role Summary

Responsible for analyzing revenue streams, forecasting sales performance, and ensuring accurate revenue reporting.

Key Responsibilities

- Analyze revenue trends and drivers
- Prepare revenue forecasts and reports
- Support pricing and sales strategy analysis
- Ensure revenue recognition accuracy
- Work closely with sales and marketing teams

Skills & Competencies

- Revenue modeling and forecasting
- Strong data interpretation skills

Tools

- Excel, Power BI
- CRM systems (Salesforce, HubSpot)

Qualifications & Experience

- Bachelor's / MBA (Finance)
 - 2–5 years revenue analysis experience
-

14. Margin Analyst

Role Summary

Specializes in tracking, analyzing, and improving gross and contribution margins.

Key Responsibilities

- Monitor gross and contribution margins
- Analyze price, volume, and cost impacts

- Support margin improvement initiatives
- Develop margin reporting dashboards
- Partner with pricing and operations teams

Skills & Competencies

- Deep margin and variance analysis
- Strong commercial understanding

Tools

- Excel, BI tools
- ERP pricing & costing modules

Qualifications & Experience

- MBA (Finance) / CA / CMA
- 3–6 years margin analysis experience

15. Investment Analyst

Role Summary

Analyzes investment opportunities across asset classes to support portfolio construction and investment decisions.

Key Responsibilities

- Research equities, fixed income, and alternative investments
- Build financial and valuation models
- Analyze macroeconomic and industry trends
- Prepare investment memos and recommendations
- Track portfolio performance and risk metrics
- Support investment committee presentations

Skills & Competencies

- Strong analytical and research skills
- Financial modeling and valuation
- Understanding of capital markets

Tools

- Excel, Power BI
- Bloomberg / Reuters / Capital IQ

Qualifications & Experience

- CFA / MBA (Finance) / CA preferred
 - 1–4 years investment research experience
-

16. Equity Research Analyst

Role Summary

Provides in-depth research and stock recommendations for publicly listed companies.

Key Responsibilities

- Perform company and industry analysis
- Build detailed financial and valuation models (DCF, multiples)
- Forecast earnings and financial performance
- Publish equity research reports and recommendations
- Interact with management and industry experts
- Monitor stock performance and catalysts

Skills & Competencies

- Strong accounting and valuation knowledge
- Written and verbal communication excellence
- Market awareness

Tools

- Excel, PowerPoint
- Bloomberg, Capital IQ

Qualifications & Experience

- CFA / CA / MBA (Finance)
 - 2–6 years equity research experience
-

17. Fixed Income Analyst

Role Summary

Analyzes debt instruments to evaluate risk, return, and portfolio suitability.

Key Responsibilities

- Analyze bonds, credit instruments, and interest rate products

- Assess credit risk and issuer fundamentals
- Monitor yield curves, spreads, and macro indicators
- Support fixed income portfolio construction
- Prepare credit notes and investment recommendations

Skills & Competencies

- Strong understanding of debt markets
- Credit analysis and risk assessment
- Macroeconomic analysis

Tools

- Excel
- Bloomberg, Yield analytics tools

Qualifications & Experience

- CFA / MBA (Finance)
- 2–6 years fixed income experience

18. Capital Markets Analyst

Role Summary

Supports capital raising, IPOs, debt issuances, and secondary market transactions.

Key Responsibilities

- Support equity and debt capital market transactions
- Prepare pitch books and offering documents
- Analyze market conditions and investor sentiment
- Coordinate with bankers, regulators, and advisors
- Track deal execution and post-listing performance

Skills & Competencies

- Strong capital markets knowledge
- Financial modeling and presentation skills
- High attention to detail

Tools

- Excel, PowerPoint
- Capital market data platforms

Qualifications & Experience

- MBA (Finance) / CA / CFA
 - 2–5 years capital markets experience
-

19. Portfolio Analyst

Role Summary

Supports portfolio managers by monitoring performance, risk, and asset allocation.

Key Responsibilities

- Track portfolio performance and attribution
- Analyze asset allocation and risk metrics
- Prepare portfolio reports for clients and management
- Support rebalancing and investment decisions
- Ensure compliance with investment guidelines

Skills & Competencies

- Portfolio analytics and risk management
- Data analysis and reporting

Tools

- Excel, Power BI
- Portfolio management systems

Qualifications & Experience

- CFA / MBA (Finance)
 - 2–5 years portfolio analysis experience
-

20. Valuation Analyst

Role Summary

Specializes in valuing companies, businesses, and assets for transactions and strategic decisions.

Key Responsibilities

- Perform DCF, comparable company, and precedent transaction valuations
- Prepare valuation reports for M&A, fundraising, and litigation
- Analyze financial statements and forecasts
- Support due diligence and deal structuring

- Present valuation findings to stakeholders

Skills & Competencies

- Advanced valuation and modeling skills
- Strong accounting understanding

Tools

- Excel, Valuation tools
- Capital IQ

Qualifications & Experience

- CA / CFA / MBA (Finance)
 - 2–6 years valuation experience
-

21. M&A Analyst

Role Summary

Supports mergers, acquisitions, and divestments through financial analysis and deal execution.

Key Responsibilities

- Build transaction and merger models
- Conduct financial and commercial due diligence
- Prepare pitch decks and information memorandums
- Analyze synergies and deal structures
- Coordinate with legal, tax, and advisory teams

Skills & Competencies

- Transaction modeling and analysis
- Strong execution and project management skills

Tools

- Excel, PowerPoint
- Data rooms (Intralinks, Datasite)

Qualifications & Experience

- MBA (Finance) / CA / CFA
- 1–4 years M&A or investment banking experience

22. Private Equity Analyst

Role Summary

Evaluates and executes private equity investments and supports portfolio companies.

Key Responsibilities

- Source and evaluate private investment opportunities
- Build leveraged buyout (LBO) models
- Conduct due diligence and market research
- Support deal execution and negotiations
- Monitor portfolio company performance

Skills & Competencies

- LBO modeling and valuation
- Strategic and operational analysis

Tools

- Excel, Power BI
- Deal sourcing platforms

Qualifications & Experience

- MBA / CA / CFA
- 2–5 years investment banking or PE experience

23. Venture Capital Analyst

Role Summary

Supports early-stage and growth-stage investments in startups.

Key Responsibilities

- Source and screen startup investment opportunities
- Analyze business models, unit economics, and scalability
- Support term sheet and valuation discussions
- Track portfolio startups and KPIs
- Conduct market and competitor research

Skills & Competencies

- Startup and innovation mindset
- Financial and qualitative analysis

Tools

- Excel, PitchBook, Crunchbase

Qualifications & Experience

- MBA (Finance/Entrepreneurship)
 - 1–4 years startup, consulting, or VC experience
-

24. [Hedge Fund Analyst](#)

Role Summary

Supports active trading and investment strategies across asset classes.

Key Responsibilities

- Research securities and trading strategies
- Analyze market data, trends, and risks
- Build financial and quantitative models
- Monitor positions and performance
- Support portfolio managers in trade execution

Skills & Competencies

- Deep market knowledge
- Quantitative and analytical skills
- High-pressure decision-making

Tools

- Excel, Python (preferred)
- Bloomberg, trading platforms

Qualifications & Experience

- CFA / MBA / Quant background
- 2–6 years hedge fund or trading experience

25. Banking Financial Analyst

Role Summary

Provides financial analysis and performance insights to support banking operations, profitability, and strategic decision-making.

Key Responsibilities

- Analyze branch, product, and segment profitability
- Prepare MIS, dashboards, and performance reports
- Support budgeting and forecasting for banking operations
- Track interest income, fee income, and cost metrics
- Assist management with business and financial analysis
- Coordinate with credit, risk, and treasury teams

Skills & Competencies

- Strong understanding of banking products and P&L
- Financial statement and ratio analysis
- Analytical and reporting skills

Tools

- Excel, Power BI
- Core banking systems

Qualifications & Experience

- MBA (Finance) / CA / CMA
 - 2–5 years banking or financial services experience
-

26. Credit Analyst

Role Summary

Evaluates borrower creditworthiness to support lending decisions and minimize credit risk.

Key Responsibilities

- Analyze borrower financial statements and cash flows
- Perform credit scoring and risk assessment
- Prepare credit appraisal and sanction notes
- Assess collateral and security structures
- Monitor loan performance and covenant compliance
- Support credit committees and approvals

Skills & Competencies

- Strong credit and financial analysis
- Risk assessment and judgment
- Attention to detail

Tools

- Excel, Credit scoring models
- Loan management systems

Qualifications & Experience

- MBA (Finance) / CA / CFA
 - 1–4 years credit analysis experience
-

27. Risk Analyst

Role Summary

Identifies, measures, and monitors financial and operational risks across the institution.

Key Responsibilities

- Identify and assess key risk exposures
- Develop risk metrics and dashboards
- Monitor compliance with risk policies
- Support enterprise risk management (ERM)
- Assist in stress testing and scenario analysis
- Report risk insights to management

Skills & Competencies

- Risk modeling and analytics
- Strong problem-solving skills
- Regulatory awareness

Tools

- Excel, Power BI
- Risk management systems

Qualifications & Experience

- MBA (Finance/Risk) / CFA / FRM
- 2–5 years risk management experience

28. Treasury Analyst

Role Summary

Manages liquidity, funding, and investment activities to ensure optimal cash and capital management.

Key Responsibilities

- Monitor daily liquidity and cash positions
- Support funding and borrowing activities
- Analyze interest rate and FX exposures
- Manage short-term investments and placements
- Support treasury reporting and compliance

Skills & Competencies

- Strong understanding of money markets
- Cash flow and liquidity management
- Market awareness

Tools

- Excel, Treasury management systems
- Bloomberg

Qualifications & Experience

- MBA (Finance) / CA / CFA
 - 2–6 years treasury experience
-

29. ALM Analyst (Asset Liability Management)

Role Summary

Manages interest rate, liquidity, and maturity mismatches between assets and liabilities.

Key Responsibilities

- Analyze asset-liability mismatches and gaps
- Conduct duration, repricing, and sensitivity analysis
- Support ALCO reporting and decision-making
- Perform stress testing and scenario analysis
- Monitor regulatory ratios (LCR, NSFR)

Skills & Competencies

- Strong ALM and balance sheet management knowledge
- Analytical and regulatory expertise

Tools

- Excel, ALM systems
- BI tools

Qualifications & Experience

- MBA (Finance) / CA / CFA / FRM
 - 3–7 years ALM experience
-

30. Financial Risk Analyst

Role Summary

Focuses on identifying and managing financial risks including credit, market, and liquidity risks.

Key Responsibilities

- Measure and monitor financial risk exposures
- Develop risk models and metrics
- Support risk policy development
- Perform stress testing and scenario analysis
- Prepare risk reports for senior management

Skills & Competencies

- Quantitative and analytical expertise
- Risk modeling and regulatory knowledge

Tools

- Excel, Power BI
- Risk analytics platforms

Qualifications & Experience

- CFA / FRM / MBA (Finance)
 - 2–6 years financial risk experience
-

31. Market Risk Analyst

Role Summary

Monitors and manages risks arising from market movements such as interest rates, FX, and equity prices.

Key Responsibilities

- Measure market risk using VaR and sensitivity metrics
- Monitor trading and investment portfolios
- Conduct stress testing and back-testing
- Ensure compliance with market risk limits
- Prepare market risk reports

Skills & Competencies

- Strong quantitative and statistical skills
- Understanding of derivatives and markets

Tools

- Excel, Python (preferred)
- Market risk systems, Bloomberg

Qualifications & Experience

- CFA / FRM / Quant background
 - 2–5 years market risk experience
-

32. Credit Risk Analyst

Role Summary

Specializes in managing credit risk across loan and investment portfolios.

Key Responsibilities

- Monitor credit portfolio quality and trends
- Develop and validate credit risk models
- Analyze defaults, recoveries, and provisions
- Support IFRS 9 / ECL modeling
- Prepare credit risk dashboards and reports

Skills & Competencies

- Advanced credit risk analytics

- Regulatory and provisioning knowledge

Tools

- Excel, Power BI
- Credit risk modeling systems

Qualifications & Experience

- FRM / CFA / MBA (Finance)
 - 3–7 years credit risk experience
-

33. Liquidity Risk Analyst

Role Summary

Ensures the institution maintains sufficient liquidity under normal and stressed conditions.

Key Responsibilities

- Monitor daily and long-term liquidity positions
- Calculate and track LCR, NSFR, and liquidity gaps
- Perform liquidity stress testing
- Support contingency funding plans
- Prepare liquidity risk reports for regulators and ALCO

Skills & Competencies

- Liquidity and cash flow analysis
- Regulatory and stress testing expertise

Tools

- Excel, Liquidity risk systems
- BI tools

Qualifications & Experience

- MBA (Finance) / CA / CFA / FRM
- 3–7 years liquidity risk experience

34. Financial Reporting Analyst

Role Summary

Responsible for preparing accurate financial statements and management reports in compliance with accounting standards and regulatory requirements.

Key Responsibilities

- Prepare monthly, quarterly, and annual financial statements
- Ensure compliance with Ind AS / IFRS / US GAAP
- Perform account reconciliations and variance analysis
- Support statutory audits and internal reviews
- Prepare disclosures, schedules, and notes to accounts
- Coordinate with accounting, audit, and finance teams

Skills & Competencies

- Strong accounting standards knowledge
- Financial statement analysis
- High accuracy and attention to detail

Tools

- Excel, ERP systems (SAP, Oracle)
- Financial reporting tools

Qualifications & Experience

- CA / CMA / MBA (Finance)
 - 2–5 years financial reporting experience
-

35. Accounting Analyst

Role Summary

Supports accounting operations by analyzing transactions, ensuring accuracy, and improving accounting processes.

Key Responsibilities

- Analyze general ledger transactions and balances
- Support month-end and year-end closing
- Prepare journal entries and account reconciliations
- Assist in accounting policy implementation
- Support audit and compliance requirements
- Improve accounting processes and controls

Skills & Competencies

- Strong accounting fundamentals
- Analytical mindset
- Process orientation

Tools

- ERP systems, Excel
- Accounting software

Qualifications & Experience

- Bachelor's / CA Inter / CMA Inter / MBA (Finance)
 - 1–4 years accounting experience
-

36. Audit Analyst

Role Summary

Assists audit teams in planning, executing, and documenting audit procedures to ensure financial accuracy and compliance.

Key Responsibilities

- Perform audit testing and documentation
- Analyze financial data and transactions
- Support internal and external audit engagements
- Identify control weaknesses and process gaps
- Assist in audit reports and findings
- Coordinate with auditees and stakeholders

Skills & Competencies

- Audit methodology and analytical skills
- Professional skepticism
- Documentation and communication skills

Tools

- Audit tools (IDEA, ACL)
- Excel, ERP systems

Qualifications & Experience

- CA / CMA / MBA (Finance)
- 1–3 years audit experience

37. SOX Compliance Analyst

Role Summary

Ensures compliance with Sarbanes-Oxley (SOX) requirements by evaluating and monitoring internal controls over financial reporting.

Key Responsibilities

- Document and test SOX controls
- Perform walkthroughs and control assessments
- Identify control deficiencies and remediation plans
- Coordinate with internal and external auditors
- Support SOX certifications and reporting
- Maintain SOX documentation and evidence

Skills & Competencies

- SOX and internal control expertise
- Risk assessment and documentation skills
- Attention to regulatory detail

Tools

- SOX compliance tools
- Excel, GRC platforms

Qualifications & Experience

- CA / CPA / CMA / MBA (Finance)
- 2–5 years SOX compliance experience

38. Internal Controls Analyst

Role Summary

Designs, evaluates, and enhances internal control frameworks to ensure effective risk management and compliance.

Key Responsibilities

- Assess internal control design and effectiveness
- Perform risk and control assessments
- Identify control gaps and recommend improvements
- Support internal audits and compliance reviews

- Monitor remediation of control issues
- Promote governance and control best practices

Skills & Competencies

- Internal control and risk management knowledge
- Process analysis and improvement skills
- Strong documentation abilities

Tools

- GRC tools, Excel
- ERP systems

Qualifications & Experience

- CA / CMA / MBA (Finance) / CIA
- 3–6 years internal controls experience

39. Regulatory Reporting Analyst

Role Summary

Ensures accurate and timely submission of regulatory reports to statutory and regulatory authorities.

Key Responsibilities

- Prepare and submit regulatory and statutory reports
- Ensure compliance with RBI / SEBI / MCA / other regulators
- Interpret regulatory guidelines and circulars
- Maintain regulatory documentation and audit trails
- Coordinate with regulators and internal teams
- Support regulatory inspections and audits

Skills & Competencies

- Strong regulatory and compliance knowledge
- High accuracy and deadline management

Tools

- Excel, Regulatory reporting systems
- ERP platforms

Qualifications & Experience

- CA / CMA / MBA (Finance)
 - 2–6 years regulatory reporting experience
-

40. Tax Analyst

Role Summary

Manages direct and indirect tax compliance, planning, and reporting for the organization.

Key Responsibilities

- Prepare and review income tax and GST returns
- Support tax assessments, audits, and notices
- Analyze tax implications of transactions
- Ensure compliance with tax laws and regulations
- Support tax provisioning and reporting
- Coordinate with tax consultants and authorities

Skills & Competencies

- Direct and indirect tax expertise
- Analytical and compliance skills

Tools

- Tax software, Excel
- ERP tax modules

Qualifications & Experience

- CA / CMA / MBA (Finance)
 - 2–5 years tax experience
-

41. Transfer Pricing Analyst

Role Summary

Ensures compliance with transfer pricing regulations for inter-company transactions.

Key Responsibilities

- Analyze inter-company transactions and pricing
- Prepare transfer pricing documentation and studies
- Perform benchmarking and comparability analysis
- Support transfer pricing audits and assessments

- Coordinate with global finance and tax teams
- Monitor changes in transfer pricing regulations

Skills & Competencies

- Transfer pricing and international tax knowledge
- Strong analytical and documentation skills

Tools

- Excel, TP databases
- ERP systems

Qualifications & Experience

- CA / MBA (Finance) / Tax specialization
- 2–6 years transfer pricing experience

42. Financial Modeling Analyst

Role Summary

Designs and maintains advanced financial models to support valuation, forecasting, investment, and strategic decisions.

Key Responsibilities

- Build integrated financial models (3-statement, DCF, LBO, project finance)
- Perform sensitivity and scenario analysis
- Support M&A, fundraising, and capital allocation decisions
- Validate assumptions and ensure model accuracy
- Prepare model outputs and insights for management

Skills & Competencies

- Advanced financial modeling and valuation
- Strong accounting and corporate finance knowledge
- High attention to detail and logic

Tools

- Excel (advanced), Power BI
- Financial modeling tools

Qualifications & Experience

- CA / CFA / MBA (Finance)
 - 2–6 years financial modeling experience
-

43. Quantitative Analyst (Quant)

Role Summary

Uses mathematical, statistical, and programming techniques to analyze financial markets and develop quantitative models.

Key Responsibilities

- Develop quantitative models for pricing, risk, and trading
- Analyze large datasets and market data
- Back-test trading and investment strategies
- Monitor model performance and risk metrics
- Collaborate with traders and portfolio managers

Skills & Competencies

- Strong mathematics, statistics, and probability
- Programming and data science expertise
- Market and derivatives knowledge

Tools

- Python, R, SQL
- Bloomberg, quant platforms

Qualifications & Experience

- Master's / PhD in Finance, Mathematics, Statistics, or Engineering
 - 2–5 years quant or trading analytics experience
-

44. Business Intelligence Analyst (Finance)

Role Summary

Transforms financial and operational data into actionable insights using dashboards and analytics.

Key Responsibilities

- Design finance dashboards and KPIs
- Integrate data from ERP, CRM, and financial systems

- Automate financial reporting and MIS
- Analyze trends, variances, and business drivers
- Support leadership with data-driven insights

Skills & Competencies

- Data visualization and storytelling
- Strong finance and business understanding
- Analytical thinking

Tools

- Power BI / Tableau
- SQL, Excel

Qualifications & Experience

- Bachelor's / MBA (Finance/Analytics)
 - 2–5 years BI or finance analytics experience
-

45. Financial Data Analyst

Role Summary

Analyzes financial datasets to identify trends, risks, and performance drivers.

Key Responsibilities

- Collect, clean, and validate financial data
- Analyze financial performance metrics
- Support forecasting, budgeting, and reporting
- Identify anomalies and data quality issues
- Provide insights through reports and dashboards

Skills & Competencies

- Strong data analysis and interpretation
- Financial and statistical knowledge

Tools

- Excel, SQL
- Power BI / Python

Qualifications & Experience

- Bachelor's / MBA (Finance/Analytics)

- 1–4 years financial data analysis experience
-

46. Forecasting Analyst

Role Summary

Specializes in predicting future financial performance using historical data and analytical models.

Key Responsibilities

- Develop revenue, cost, and cash flow forecasts
- Analyze trends and seasonality
- Build forecasting models and assumptions
- Perform variance and accuracy analysis
- Support planning and budgeting cycles

Skills & Competencies

- Strong forecasting and statistical skills
- Business and financial insight

Tools

- Excel (advanced), Power BI
- Forecasting and FP&A tools

Qualifications & Experience

- MBA (Finance) / CA / CMA
 - 2–5 years forecasting or FP&A experience
-

47. Scenario Planning Analyst

Role Summary

Supports strategic decision-making by evaluating multiple future scenarios and their financial impact.

Key Responsibilities

- Develop best-case, base-case, and worst-case scenarios
- Perform sensitivity and stress testing
- Support long-term strategic planning
- Analyze risks and uncertainties

- Present scenario outcomes to leadership

Skills & Competencies

- Strategic and analytical thinking
- Advanced modeling and communication

Tools

- Excel, Power BI
- Strategic planning tools

Qualifications & Experience

- MBA (Finance/Strategy) / CA / CFA
- 3–7 years strategy or advanced finance experience

48. Banking Analyst

Role Summary

Supports banking operations and strategic initiatives through financial analysis of products, branches, and portfolios.

Key Responsibilities

- Analyze banking products (loans, deposits, fees) performance
- Prepare branch and segment profitability reports
- Support credit, risk, and treasury teams
- Track interest income, NIM, and cost metrics
- Assist in budgeting and forecasting for banking operations

Skills & Competencies

- Strong understanding of banking products and ratios
- Financial and MIS analysis

Tools

- Excel, Power BI
- Core banking systems

Qualifications & Experience

- MBA (Finance) / CA / CMA
 - 2–5 years banking experience
-

49. Insurance Financial Analyst

Role Summary

Analyzes financial performance, profitability, and risk in insurance products and portfolios.

Key Responsibilities

- Analyze premium income, claims, and loss ratios
- Support actuarial and underwriting teams
- Prepare profitability and solvency analysis
- Assist in pricing and reserve analysis
- Support regulatory and financial reporting

Skills & Competencies

- Insurance finance and risk understanding
- Analytical and reporting skills

Tools

- Excel, BI tools
- Insurance management systems

Qualifications & Experience

- MBA (Finance) / CA / Actuarial exposure preferred
 - 2–5 years insurance finance experience
-

50. FinTech Analyst

Role Summary

Provides financial insights for digital financial products and technology-driven business models.

Key Responsibilities

- Analyze unit economics and transaction-level profitability
- Track customer acquisition cost (CAC) and lifetime value (LTV)
- Support pricing and growth strategy decisions
- Analyze payments, lending, or wealth platforms

- Build dashboards for real-time performance tracking

Skills & Competencies

- Strong understanding of fintech business models
- Data-driven financial analysis

Tools

- Excel, SQL, Power BI
- Product analytics tools

Qualifications & Experience

- MBA (Finance/Analytics)
 - 1–4 years fintech or startup experience
-

51. Real Estate Financial Analyst

Role Summary

Analyzes real estate investments, projects, and portfolios to support development and acquisition decisions.

Key Responsibilities

- Build real estate financial models and cash flow projections
- Analyze project feasibility and IRR
- Support land acquisition and project financing
- Monitor construction budgets and timelines
- Prepare investor and lender reports

Skills & Competencies

- Real estate valuation and modeling
- Project finance knowledge

Tools

- Excel, real estate modeling tools

Qualifications & Experience

- MBA (Finance) / CA
 - 2–6 years real estate finance experience
-

52. Infrastructure Finance Analyst

Role Summary

Supports financing and analysis of large-scale infrastructure and PPP projects.

Key Responsibilities

- Build project finance and cash flow models
- Analyze debt structuring and funding options
- Support bid evaluation and concession agreements
- Monitor project performance post-financial close
- Coordinate with lenders and government bodies

Skills & Competencies

- Project finance and infrastructure knowledge
- Long-term financial modeling

Tools

- Excel, project finance models

Qualifications & Experience

- MBA (Finance) / CA / CFA
 - 3–7 years infrastructure finance experience
-

53. Manufacturing Financial Analyst

Role Summary

Supports manufacturing operations through cost analysis, budgeting, and profitability improvement.

Key Responsibilities

- Analyze product costing and margins
- Support inventory and working capital management
- Perform variance analysis (standard vs actual cost)
- Support plant budgeting and cost control
- Work with operations and supply chain teams

Skills & Competencies

- Cost accounting and manufacturing finance
- Process and operational understanding

Tools

- Excel, ERP systems (SAP)

Qualifications & Experience

- CMA / CA / MBA (Finance)
 - 2–6 years manufacturing finance experience
-

54. Retail Finance Analyst

Role Summary

Analyzes retail performance across stores, channels, and products to drive profitability and growth.

Key Responsibilities

- Analyze store and category profitability
- Track sales, margins, and inventory metrics
- Support pricing, promotions, and discount strategies
- Forecast demand and sales trends
- Support omni-channel performance analysis

Skills & Competencies

- Retail metrics and commercial analysis
- Business partnering skills

Tools

- Excel, Power BI
- POS and retail systems

Qualifications & Experience

- MBA (Finance)
 - 2–5 years retail finance experience
-

55. Healthcare Financial Analyst

Role Summary

Supports hospitals, pharma, or healthcare organizations with financial planning and cost optimization.

Key Responsibilities

- Analyze service line and patient-level profitability
- Support budgeting and forecasting for healthcare units
- Track reimbursements, costs, and margins
- Support capital expenditure analysis
- Ensure compliance with healthcare regulations

Skills & Competencies

- Healthcare finance and reimbursement knowledge
- Analytical and compliance skills

Tools

- Excel, BI tools
- Healthcare management systems

Qualifications & Experience

- MBA (Finance) / CA
 - 2–6 years healthcare finance experience
-

56. Energy & Power Finance Analyst

Role Summary

Supports financial planning and analysis for energy, power generation, and utility projects.

Key Responsibilities

- Analyze project economics and tariffs
- Build financial models for power and renewable projects
- Support PPAs and regulatory filings
- Track operating costs and margins
- Support funding and refinancing decisions

Skills & Competencies

- Energy sector finance and regulation knowledge
- Long-term financial modeling

Tools

- Excel, BI tools

Qualifications & Experience

- MBA (Finance) / CA
 - 3–7 years energy or power finance experience
-

57. Government / Public Sector Financial Analyst

Role Summary

Supports financial planning, budgeting, and evaluation of public sector programs and projects.

Key Responsibilities

- Prepare budgets and expenditure analysis
- Evaluate public programs and policy outcomes
- Perform cost-benefit and economic analysis
- Support audits and compliance
- Prepare reports for government bodies and regulators

Skills & Competencies

- Public finance and policy understanding
- Strong analytical and documentation skills

Tools

- Excel, government financial systems

Qualifications & Experience

- MBA (Finance/Public Policy) / CA
- 2–6 years public sector finance experience

58. Financial Advisory Analyst

Role Summary

Supports clients with financial analysis, strategic insights, and advisory services to improve performance and support key business decisions.

Key Responsibilities

- Analyze financial statements, cash flows, and business performance
- Support valuation, financial modeling, and scenario analysis

- Prepare advisory reports and client presentations
- Assist in strategic planning and financial restructuring
- Coordinate with internal teams and client stakeholders
- Support multiple advisory engagements simultaneously

Skills & Competencies

- Strong financial analysis and modeling
- Client communication and presentation skills
- Problem-solving mindset

Tools

- Excel, PowerPoint
- BI and financial analysis tools

Qualifications & Experience

- CA / CMA / MBA (Finance) / CFA
- 1–4 years financial advisory or consulting experience

59. Transaction Advisory Analyst

Role Summary

Supports mergers, acquisitions, divestments, and capital transactions through detailed financial analysis and execution support.

Key Responsibilities

- Perform financial due diligence for buy-side and sell-side deals
- Analyze quality of earnings, working capital, and cash flows
- Build transaction and deal models
- Support deal structuring and negotiations
- Prepare transaction reports and investor materials
- Coordinate with legal, tax, and investment teams

Skills & Competencies

- Transaction analysis and financial modeling
- High attention to detail and execution discipline
- Ability to work under tight deadlines

Tools

- Excel, PowerPoint
- Data rooms (Datasite, Intralinks)

Qualifications & Experience

- CA / MBA (Finance) / CFA
 - 1–4 years transaction advisory or investment banking experience
-

60. Restructuring Analyst

Role Summary

Assists distressed or underperforming businesses with financial restructuring, turnaround planning, and insolvency processes.

Key Responsibilities

- Analyze liquidity, cash flows, and capital structures
- Develop turnaround and restructuring models
- Support debt restructuring and refinancing negotiations
- Assist in insolvency and bankruptcy processes
- Prepare restructuring plans and creditor presentations
- Monitor post-restructuring performance

Skills & Competencies

- Strong cash flow and restructuring analysis
- Legal and insolvency process awareness
- Crisis management mindset

Tools

- Excel, Power BI
- Restructuring and insolvency tools

Qualifications & Experience

- CA / MBA (Finance) / CFA
 - 2–6 years restructuring, turnaround, or insolvency experience
-

61. Corporate Advisory Analyst

Role Summary

Advises corporates on strategic initiatives, capital structure, and long-term financial decisions.

Key Responsibilities

- Support strategic planning and corporate finance initiatives
- Build valuation and financial models
- Assist in capital raising, M&A, and divestment advisory
- Prepare board-level presentations and strategy decks
- Analyze market, industry, and competitor data
- Coordinate with senior advisors and clients

Skills & Competencies

- Corporate finance and strategy expertise
- Strong analytical and presentation skills

Tools

- Excel, PowerPoint
- Financial databases

Qualifications & Experience

- MBA (Finance/Strategy) / CA / CFA
- 2–5 years corporate or investment advisory experience

62. Deal Advisory Analyst

Role Summary

Provides end-to-end advisory support across deal lifecycles, from evaluation to execution and post-deal integration.

Key Responsibilities

- Support buy-side and sell-side deal analysis
- Perform valuation, modeling, and synergy analysis
- Assist in due diligence and deal execution
- Support integration and post-deal performance tracking
- Prepare deal summaries and investment committee materials

Skills & Competencies

- End-to-end deal understanding
- Strong execution and multitasking abilities

Tools

- Excel, PowerPoint
- Deal management tools

Qualifications & Experience

- CA / MBA (Finance) / CFA
 - 1–5 years deal advisory or M&A experience
-

63. Due Diligence Analyst

Role Summary

Conducts detailed financial and commercial due diligence to assess risks, opportunities, and deal viability.

Key Responsibilities

- Analyze historical financial statements and forecasts
- Assess quality of earnings, working capital, and cash flows
- Identify financial, operational, and compliance risks
- Support due diligence reports and findings
- Work closely with transaction and deal teams
- Support client and investor discussions

Skills & Competencies

- Strong financial statement analysis
- Investigative and risk-focused mindset

Tools

- Excel, PowerPoint
- Data room platforms

Qualifications & Experience

- CA / MBA (Finance) / CFA
- 1–4 years due diligence or audit experience

64. Startup Financial Analyst

Role Overview

A Startup Financial Analyst supports founders and leadership teams with financial insights, runway management, and data-driven decision-making in early-stage and growth-stage startups.

Key Responsibilities

- Build and maintain financial models (cash flow, runway, burn rate)
- Prepare monthly MIS, dashboards, and KPI reports
- Track operating expenses and optimize cost structures
- Support fundraising activities (pitch decks, investor data rooms)
- Analyze business performance vs projections
- Assist in pricing, budgeting, and financial planning
- Work closely with founders, product, and operations teams

Required Skills & Tools

- Strong financial modeling & Excel / Google Sheets
- Understanding of startup metrics (CAC, LTV, churn, burn)
- Basic accounting and financial statement knowledge
- Tools: Excel, Google Sheets, QuickBooks, Zoho, Power BI
- Analytical thinking and adaptability

Typical Employers

Early-stage startups, VC-backed companies, incubators, accelerators

65. Growth Finance Analyst

Role Overview

A Growth Finance Analyst focuses on scaling revenue, improving profitability, and supporting expansion strategies using financial and operational data.

Key Responsibilities

- Analyze revenue growth drivers and customer acquisition costs
- Monitor unit economics and cohort performance
- Support pricing strategy and market expansion decisions
- Build forecasts aligned with growth targets
- Partner with marketing and sales teams on ROI analysis
- Track funnel metrics and conversion efficiency
- Identify scalable cost optimization opportunities

Required Skills & Tools

- Advanced Excel and financial modeling
- Strong understanding of growth metrics and funnels

- SQL / BI tools knowledge is a plus
- Business acumen and cross-functional collaboration
- Data visualization and storytelling skills

Typical Employers

High-growth startups, scale-ups, digital platforms, D2C brands

66. Unit Economics Analyst

Role Overview

A Unit Economics Analyst evaluates the profitability of individual products, customers, or transactions to ensure sustainable business growth.

Key Responsibilities

- Analyze cost vs revenue per unit (customer, product, order)
- Calculate CAC, LTV, contribution margin, payback period
- Identify loss-making segments and optimization opportunities
- Support pricing and discount strategy decisions
- Create unit-level financial dashboards
- Work with product, marketing, and operations teams

Required Skills & Tools

- Strong financial analysis and cost modeling
- Deep understanding of variable vs fixed costs
- Excel, BI tools, SQL (preferred)
- Logical reasoning and attention to detail
- Startup and product-based business understanding

Typical Employers

SaaS companies, marketplaces, e-commerce startups, fintechs

67. SaaS Finance Analyst

Role Overview

A SaaS Finance Analyst specializes in subscription-based financial models, recurring revenue analysis, and SaaS performance metrics.

Key Responsibilities

- Track and analyze SaaS metrics (MRR, ARR, churn, ARPU)
- Build subscription revenue and cohort models
- Support pricing, packaging, and retention strategies
- Prepare forecasts aligned with SaaS growth stages
- Analyze customer lifetime value and expansion revenue
- Support investor reporting and board presentations

Required Skills & Tools

- Strong knowledge of SaaS business models
- Financial modeling and forecasting expertise
- Excel, BI tools, CRM and subscription tools
- Analytical mindset with attention to recurring metrics
- Experience with SaaS KPIs and benchmarks

Typical Employers

B2B SaaS startups, tech platforms, subscription-based businesses

68. Product Finance Analyst

Role Overview

A Product Finance Analyst partners with product teams to evaluate product profitability, investment decisions, and long-term value creation.

Key Responsibilities

- Analyze financial performance of individual products/features
- Support product roadmap and investment decisions
- Build cost-benefit and ROI analysis for new features
- Track product-level revenue, margins, and adoption
- Collaborate with product managers and engineering teams
- Provide financial inputs for go-to-market strategies

Required Skills & Tools

- Financial analysis and business case modeling
- Strong communication with technical and product teams
- Excel, BI tools, product analytics platforms
- Strategic thinking and data interpretation
- Understanding of agile and product development cycles

69. Finance Analyst Intern

Role Overview

A Finance Analyst Intern supports the finance team with data analysis, reporting, and basic financial modeling while gaining hands-on exposure to real business finance operations.

Key Responsibilities

- Assist in preparing financial reports and dashboards
- Support data collection for budgeting and forecasting
- Analyze expenses, revenues, and variances
- Help maintain financial models in Excel / Sheets
- Perform market and competitor research
- Support month-end closing activities
- Document financial processes and learn compliance basics

Skills & Qualifications

- Pursuing or recently completed degree in Finance, Accounting, Economics, or Business
- Strong Excel / Google Sheets skills
- Basic understanding of financial statements
- Analytical and problem-solving mindset
- Willingness to learn and take feedback

Who Should Apply

Students or fresh graduates looking for practical finance exposure

70. Business Finance Intern

Role Overview

A Business Finance Intern works closely with business teams to analyze performance, support budgeting, and provide insights that help improve operational efficiency.

Key Responsibilities

- Assist in business performance analysis and MIS reporting
- Support budgeting and cost control activities
- Analyze sales, operations, and margin data
- Help track KPIs and business metrics
- Support ad-hoc financial analysis for management
- Coordinate with sales and operations teams

Skills & Qualifications

- Education in Finance, Business Management, or Economics
- Good Excel and basic financial analysis skills
- Understanding of business metrics and profitability
- Communication and coordination skills
- Interest in commercial and operational finance

Who Should Apply

Candidates interested in business-oriented finance roles

71. Investment Analyst Intern

Role Overview

An Investment Analyst Intern supports investment research, valuation, and deal analysis under senior analysts in asset management, private equity, or investment firms.

Key Responsibilities

- Conduct industry and company research
- Assist in financial statement analysis
- Support valuation models (DCF, comparables)
- Prepare investment notes and presentations
- Track market trends and economic indicators
- Support due diligence and data room activities

Skills & Qualifications

- Strong interest in investments and capital markets
- Basic knowledge of valuation techniques
- Advanced Excel and PowerPoint skills
- Strong research and analytical abilities
- Attention to detail and numerical accuracy

Who Should Apply

Students aspiring for careers in investment banking, PE, VC, or equity research

72. Financial Research Analyst

Role Overview

A Financial Research Analyst focuses on collecting, analyzing, and interpreting financial and economic data to support strategic, investment, or business decisions.

Key Responsibilities

- Perform company, industry, and market research
- Analyze financial statements and trends
- Prepare research reports and summaries
- Track macroeconomic and sector developments
- Support senior analysts with data and insights
- Maintain research databases and models

Skills & Qualifications

- Strong analytical and research skills
- Knowledge of financial statements and ratios
- Proficiency in Excel and presentation tools
- Clear written communication
- Ability to work with large data sets

Who Should Apply

Graduates interested in analysis-heavy finance and research roles

73. Finance Operations Analyst

Role Overview

A Finance Operations Analyst supports day-to-day financial operations, ensuring accuracy, process efficiency, and smooth execution of finance workflows.

Key Responsibilities

- Support accounts payable and receivable processes
- Assist in invoice processing and reconciliations
- Maintain financial records and documentation
- Support month-end and year-end closing
- Monitor operational finance KPIs
- Improve finance process efficiency and controls
- Coordinate with internal teams and vendors

Skills & Qualifications

- Degree in Finance, Accounting, or Commerce
- Strong attention to detail and accuracy
- Excel and ERP system exposure preferred
- Process-oriented mindset
- Good communication and coordination skills

74. Finance Manager

Role Overview

The Finance Manager oversees financial planning, reporting, budgeting, and controls to ensure accurate financial management and support business decision-making.

Key Responsibilities

- Manage budgeting, forecasting, and variance analysis
- Oversee monthly, quarterly, and annual financial reporting
- Monitor cash flows, working capital, and cost controls
- Support management with financial insights and analysis
- Ensure compliance with accounting standards and policies
- Lead and mentor finance analysts and accountants
- Coordinate with auditors, banks, and external stakeholders

Skills & Qualifications

- Degree in Finance / Accounting (CA, CMA, MBA preferred)
 - 6–10 years of finance experience
 - Strong knowledge of financial statements and controls
 - Advanced Excel and ERP system skills
 - Leadership and stakeholder management skills
-

75. FP&A Manager (Financial Planning & Analysis Manager)

Role Overview

The FP&A Manager drives financial planning, forecasting, and performance management to enable strategic and operational decision-making.

Key Responsibilities

- Lead annual budgeting and rolling forecasts
- Develop financial models and scenario analysis
- Analyze business performance and KPIs
- Partner with business units for planning and cost optimization
- Prepare management dashboards and board presentations
- Identify risks, opportunities, and improvement areas
- Manage and develop FP&A team members

Skills & Qualifications

- CA / CMA / MBA (Finance) preferred

- 7–12 years of FP&A or corporate finance experience
 - Strong modeling and analytical skills
 - Expertise in Excel, Power BI, Tableau, or similar tools
 - Strategic thinking and business partnering capability
-

76. Strategy Manager

Role Overview

The Strategy Manager supports senior leadership in defining long-term business strategy, growth initiatives, and strategic investments.

Key Responsibilities

- Conduct market, industry, and competitor analysis
- Develop strategic plans and business cases
- Support mergers, acquisitions, and expansion projects
- Evaluate growth opportunities and new business models
- Track strategy execution and performance metrics
- Prepare presentations for leadership and board discussions

Skills & Qualifications

- MBA / CA / CFA preferred
 - 6–10 years of strategy, consulting, or corporate finance experience
 - Strong analytical, research, and presentation skills
 - Financial modeling and valuation expertise
 - Stakeholder management and communication skills
-

77. Finance Controller

Role Overview

The Finance Controller ensures accurate financial reporting, strong internal controls, and compliance with statutory and regulatory requirements.

Key Responsibilities

- Oversee accounting, financial reporting, and closing processes
- Ensure compliance with accounting standards and regulations
- Manage audits, tax filings, and regulatory reporting
- Establish and monitor internal controls and policies
- Oversee cash management and treasury operations
- Lead accounting and compliance teams

Skills & Qualifications

- Chartered Accountant (CA) or equivalent
 - 8–15 years of accounting and controllership experience
 - Strong knowledge of IFRS / Ind AS / GAAP
 - ERP and process automation experience
 - High attention to detail and control mindset
-

78. Head of Finance

Role Overview

The Head of Finance leads the entire finance function, aligning financial strategy with business objectives and supporting organizational growth.

Key Responsibilities

- Define and execute finance strategy aligned with business goals
- Oversee FP&A, accounting, treasury, and compliance functions
- Lead budgeting, forecasting, and performance management
- Partner with leadership on strategic decisions
- Manage investor relations and funding activities
- Build, scale, and mentor finance teams

Skills & Qualifications

- CA / CMA / MBA (Finance)
 - 12–18 years of progressive finance leadership experience
 - Strong strategic, leadership, and communication skills
 - Experience with fundraising, M&A, or scaling businesses
 - Ability to work closely with founders and CEOs
-

79. Director of Finance

Role Overview

The Director of Finance provides senior-level financial leadership, driving financial performance, governance, and long-term planning.

Key Responsibilities

- Lead financial planning, reporting, and controls at enterprise level
- Support corporate strategy and long-range planning
- Oversee capital structure, investments, and risk management
- Ensure financial governance and compliance

- Present financial performance to board and stakeholders
- Develop senior finance leadership talent

Skills & Qualifications

- CA / CPA / CFA / MBA preferred
 - 15+ years of senior finance experience
 - Strong board-level communication skills
 - Expertise in corporate finance and governance
 - Proven leadership in complex organizations
-

80. Chief Financial Officer (CFO)

Role Overview

The CFO is responsible for the overall financial health, strategy, governance, and sustainability of the organization.

Key Responsibilities

- Define and execute financial and business strategy
- Oversee finance, accounting, treasury, tax, and compliance
- Lead fundraising, investor relations, and capital allocation
- Support CEO and board with strategic insights
- Manage risk, governance, and internal controls
- Drive profitability, growth, and long-term value creation

Skills & Qualifications

- CA / CPA / CFA / MBA (Finance)
- 15–25+ years of senior finance leadership experience
- Strong strategic, commercial, and leadership skills
- Experience in capital markets, M&A, and governance
- Ability to influence at board and investor level
