

Zecpath AI

Intelligent Hiring

Automation System

AI-Based Recruitment & Interview Evaluation Platform — Built for the Enterprise

AI-POWERED

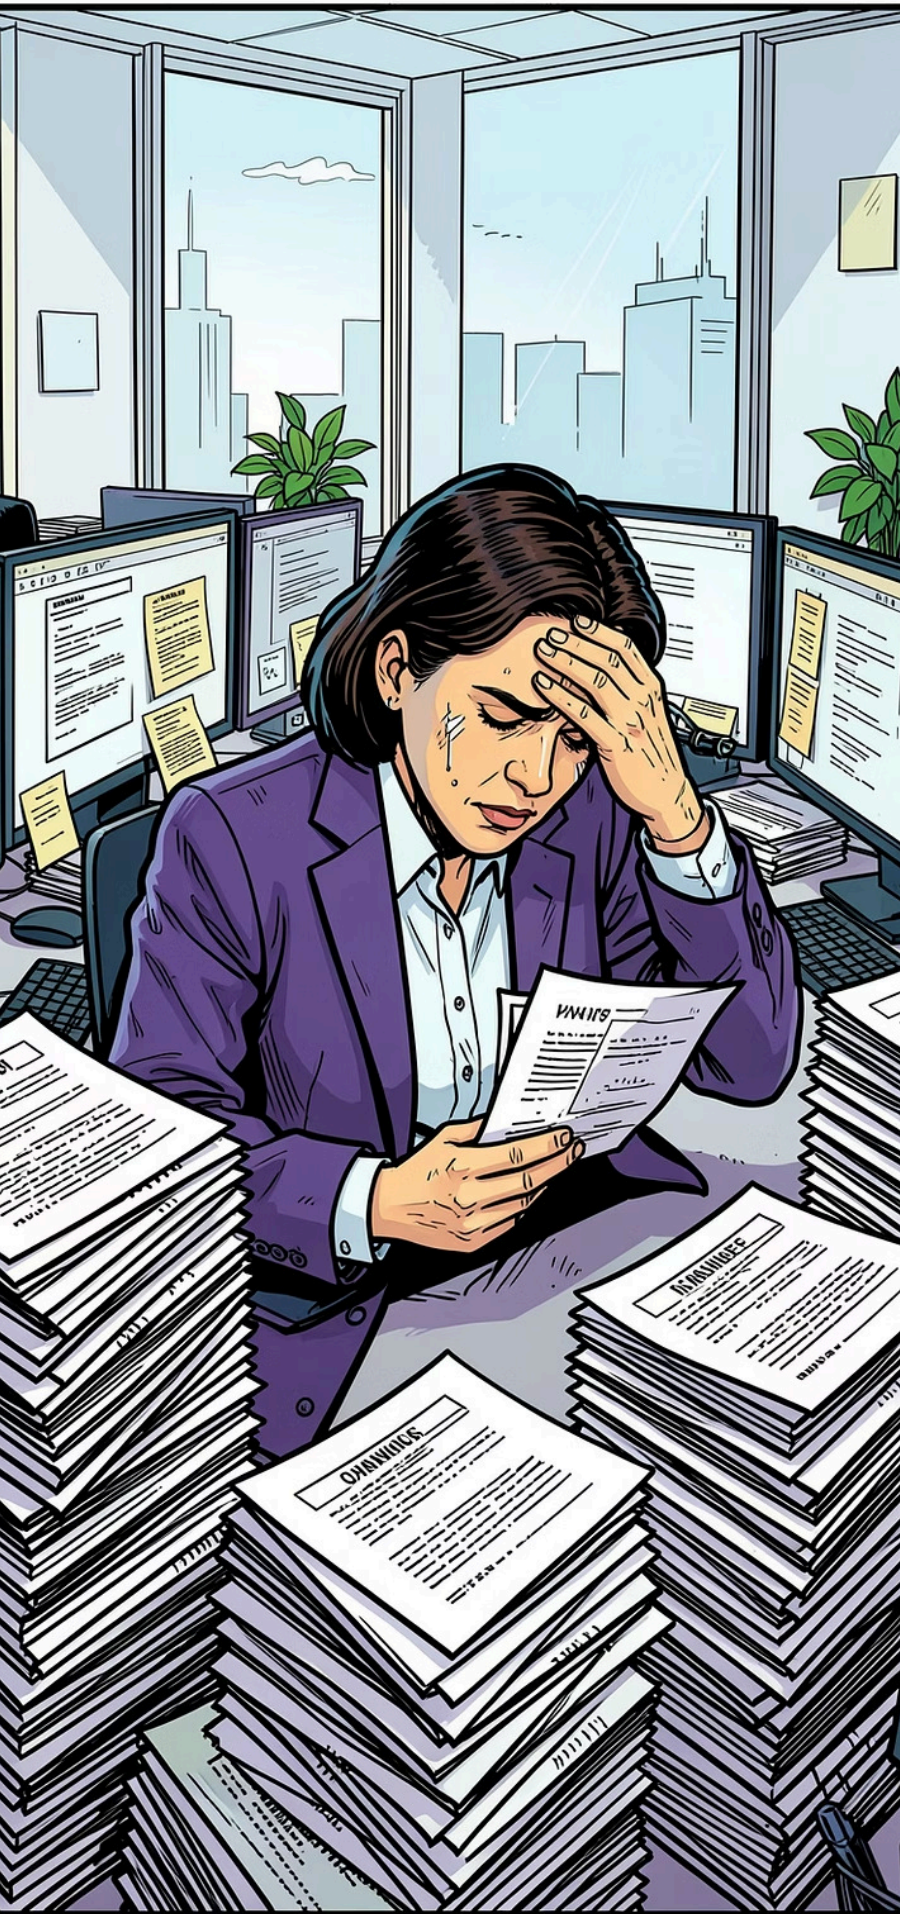

END-TO-END AUTOMATION

ENTERPRISE-GRADE

Made with GAMMA

The Hiring Problem Is Broken

Traditional recruitment is slow, inconsistent, and costly — enterprises lose top talent before interviews even begin.

6s

Resume Review Time

Average time a recruiter spends per resume

75%

Manual Effort

Of hiring decisions still made without data support

3x

Recruiter Workload

Higher during peak hiring seasons

40%

Bias in Screening

Of evaluations affected by unconscious bias

One Platform. Every Stage of Hiring.

Zecpath AI automates the entire recruitment pipeline — from resume upload to final hiring recommendation — with intelligent, explainable AI at every step.

Resume Upload

ATS Scoring

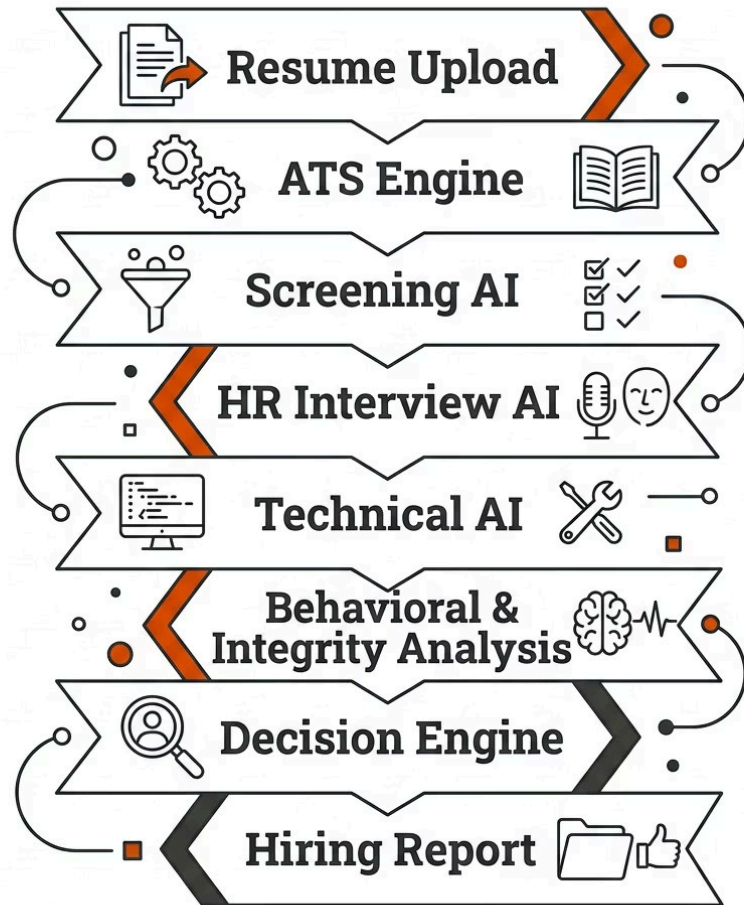

AI Screening

Interview & Decision

Each stage is powered by a dedicated AI module, ensuring consistent, bias-reduced, and auditable evaluations across every candidate.

System Architecture

Modular by Design

Each layer operates as an independent microservice, communicating via secure API contracts. This architecture enables:

- Independent scaling of high-load modules
- Seamless integration with existing HR systems
- Full audit trail across every decision point
- Pluggable AI models for domain-specific roles

Seven Intelligent AI Modules

ATS Scoring Engine

Parses and scores resumes against job descriptions using NLP.

Screening AI

Filters candidates by qualifications, experience, and role fit.

HR Interview AI

Evaluates soft skills, communication, and cultural alignment.

Technical Interview AI

Assesses coding ability and domain knowledge in real time.

Behavioral AI

Analyzes confidence, consistency, and integrity signals.

Machine Test AI

Auto-grades coding challenges with test-case validation.

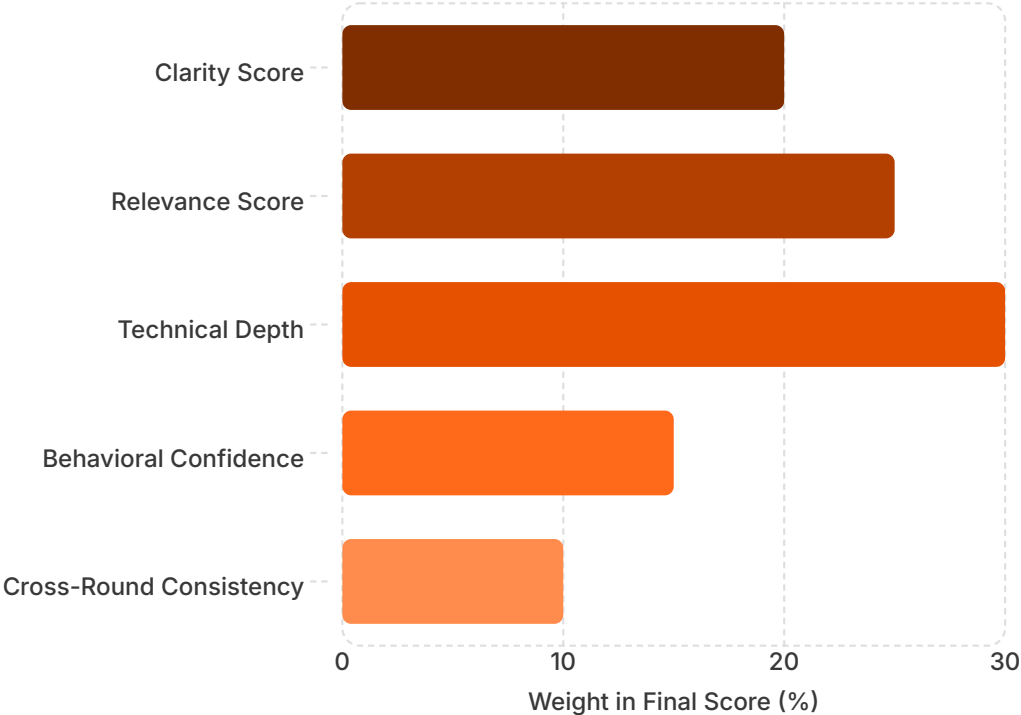

Decision AI

Aggregates all signals into a single hiring-fit score.

Scoring & Evaluation System

Evaluation Metric

Multi-Dimensional Candidate Scoring

Every candidate receives a composite **Hiring Fit Percentage** derived from weighted scores across all evaluation rounds.

Clarity & Relevance

NLP-driven analysis of answer quality and job-description alignment

Technical Depth

Domain-specific question scoring with difficulty calibration

Behavioral Confidence

Pattern detection across interview rounds for consistency signals

Security & Scalability

Enterprise-Grade Security

Built to meet the compliance and security standards of large organizations.

Scalability Architecture

JWT Authentication

Stateless, token-based session management

AES-256 Encryption

All candidate data encrypted at rest and in transit

Audit Logs & Access Control

Immutable logs with role-based access policies

→ **Batch Processing** — Parallel evaluation of hundreds of candidates

→ **Load Balancing** — Auto-scales under peak hiring demand

→ **Microservices** — Each AI module scales independently

Demo Dataset & Pipeline Simulation

What We Tested

The full Zecpath AI pipeline was validated end-to-end using realistic hiring scenarios.

10 Resumes

Diverse candidate profiles across multiple seniority levels

Multiple Job Descriptions

Varied roles to test ATS scoring accuracy and relevance

Full Pipeline Testing

Every AI module evaluated in sequence with real output data

Realistic Simulations

Interview responses, coding tests, and behavioral scenarios

Business Impact & Future Scope

Proven Business Impact

Faster Hiring

Automated screening cuts time-to-hire significantly

Reduced Workload

Recruiters focus on strategy, not manual screening

Better Accuracy

Data-driven decisions reduce mis-hires

Explainable AI

Every recommendation is traceable and auditable

Future Roadmap

AI Video Interview Analysis

Facial expression and tone detection

AI Coaching Assistant

Personalized feedback for candidates

Recruiter Analytics Dashboard

Zecpath AI — Ready for the Real World

A production-ready, fully automated recruitment intelligence platform — built to scale, built to decide, built to transform hiring.

Production-Ready

Full-stack, tested, and deployable

Fully Automated

Zero manual intervention in core pipeline

Scalable & Modular

Microservices architecture for enterprise growth

Intelligent Decisions

Explainable AI with full audit trails
